CHAPTER 2

Data Reconciliation

Breaking New Ground:
Shifting Gears in Extractives Governance

20 December 2024

PH - Extractive Industries Transparency Initiative (EITI)
Department of Finance
Roxas Blvd., Malate, Manila

To: PH-EITI Multi-Sectoral Group

I have performed the procedures agreed with you with respect to information disclosed in the reporting templates (Templates) of identified companies and government agencies (Agencies). Our engagement was undertaken in accordance with Philippine Standard on Related Services 4400, *Engagements to Perform Agreed-Upon Procedures Regarding Financial Information*. The agreed upon procedures (AUP) were performed in accordance with the seventh implementation of the Extractive Industries Transparency Initiative (EITI) project (Project) in the Philippines, and ultimately in the preparation of the Financial Reconciliation Report (Report).

Please refer to the Sections *II and IV* for the procedures and actual results, respectively.

Because the procedures do not constitute either an audit or a review made in accordance with Philippine Standards on Auditing (PSA) or Philippine Standards on Review Engagement (PSRE), I do not express any assurance on the information detailed in the Templates based on the said standards.

Had I performed additional procedures or performed an audit or review of the financial information as reported in the Templates in accordance with PSA or PSRE, other matters might have come to my attention that would have been reported to you. My report is intended solely for the purpose set forth in the first paragraph of this report and for your information and is not to be used for any other purpose or to be distributed to any other parties. In addition, this report relates only to information disclosed in the Templates submitted by companies and agencies, and does not extend to the financial statements of each taken as a whole.

Linnet Madelane C. Chan

CPA Certificate No. 143584

P.T.R. No. 1498692; issued on January 09, 2024, issued in Dagupan City

CTC No. 22402352, issued on January 09, 2024

Tax Identification No. 311-823-265-000

BOA Reg. No. 8355 effective until October 31, 2027

Chapter II. Data Reconciliation Report

I. Chapter Summary

The Tenth PH-EITI Country Report (Report) covers the reconciliation procedures performed on the tax and other payments made by the companies engaged in large-scale metallic and non-metallic mining, oil and gas, and coal sectors of the extractive industry and collections disclosed by the government for the fiscal year 2022. The detailed reconciliation procedures are discussed in page 84, Section II, Methodology.

In the context of the Report, a “project” is defined as a series of extractive activities in one or more sites (based on the permit granted to the holder) developed by a mining/oil and gas/coal company for exploration and commercial operation and is identified on a per contract/permit basis (i.e., per MPSA/FTAA for mining companies, per SC for oil and gas companies or per COC for coal companies). “Project” would be consistently used throughout the Report to refer to mining projects, oil and gas, and coal companies.

The Report covers a total of 41 metallic mining companies (40 metallic mining projects), 27 non-metallic mining companies (46 non-metallic projects), three (3) oil and gas companies (3 oil and gas project), eight (8) national agencies, 54 local government units for direct payments to LGU, and 141 local government units for shares in national wealth. The national agencies include the BIR, MGB, DOE, DBM, BTr, BOC, PPA, and NCIP. The data for LGU was obtained from BLGF. The details of participating projects and companies are shown in Tables 18, 19, and 20 in page 69, Section III, Scope of the report.

Both participating projects and national and local agencies completed and submitted reporting templates (templates) disclosing, among others, revenue streams paid or collected, mandatory expenditures, and funds for fiscal year 2022.

A. Revenue streams and other taxes as reported by government agencies

Tables 1 and 2 show the aggregate data for revenue streams and other taxes reported by the government agencies for the extractive industry segregated by sectors and the aggregate data for revenue streams reported by the government agencies for the targeted projects, respectively. Table 3 identifies which of the revenue streams of the targeted projects are scoped-in and scoped-out for further reconciliation. Note that Rio Tuba Nickel Mining Corporation is in-scope for both metallic and non-metallic mining sectors. Since some of the data cannot be segregated accurately, it will be presented under metallic mining unless otherwise stated. In addition, for the non-metallic mining sector, the taxes cannot be disaggregated accurately; thus, the collections reported by the BIR are attributed to the sector’s transactions for their raw mineral products as well as finished manufactured products.

Table II-1. Aggregate data for revenue streams and other collections as reported by each government agency for the extractive industry segregated by sectors

Agency	Metallic mining	Non-metallic mining	Oil and gas	Coal	Total
BIR	13,759,039,308	10,768,449,385	6,601,307,369	1,715,404,746	32,844,200,808
BOC	858,829,663	1,999,612,939	44,986,437	25,241,797	2,928,670,835
DOE	Not applicable	Not applicable	27,062,298,248	15,844,684,308	42,906,982,556
LGU	1,336,272,667	509,375,713	277,618	246,139,565	2,092,065,563
MGB	2,475,479,234	-	Not applicable	Not applicable	2,475,479,234
PPA	360,567,838	54,920,842	16,506	33,456,497	448,961,682

Subtotal	18,790,188,710	13,332,358,878	33,708,886,177	17,864,926,913	83,696,360,678
NCIP	170,203,454	-	Not applicable	Not applicable	170,203,454
Total	18,960,392,164	13,332,358,878	33,708,886,177	17,864,926,913	83,866,564,132

Figure II-1. Revenue streams and other taxes as reported by government agencies for 2022 and 2021

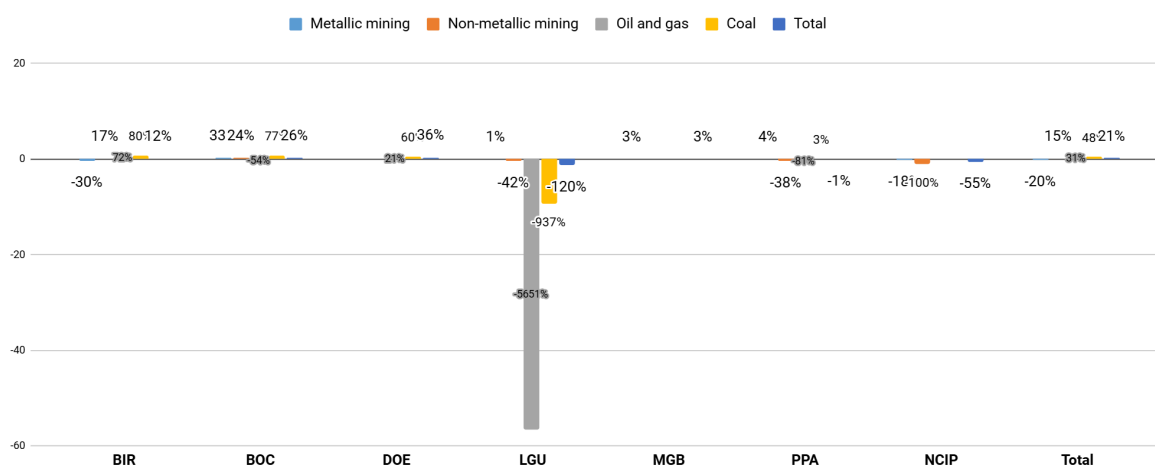

Figure 1 compares the data collected from the government agencies for 2022 and 2021 and it is evident that the total revenue streams and other taxes of the extractive industry increased by 21% or PhP17bn with the oil and gas and coal sector being the main factor. The overall increase serves as an indication that reconciled revenue streams and other taxes for 2022 would also increase. The revenue streams from the oil and gas and coal sector increased by 31% or PhP10.5bn and 48% or PhP8.6bn, respectively. High prices and high demand for oil and coal for the year 2022 were the reasons for the increase. This increase would also result to an increase in the reconciled revenue streams and other taxes for 2022.

Among the government agencies, reported collections by DOE increased by 36% or PhP15.3bn which is the largest increase followed by BOC with 26% or PhP754m increase, BIR with 12% or PhP3.8bn and then MGB with 3% or PhP66.7m. LGU, on the other hand, reported 120% or PhP2.5bn lower compared to 2021 which is the biggest contributor to the decrease followed by PPA with 1% or PhP4m decrease and then NCIP with 55% or PhP93m.

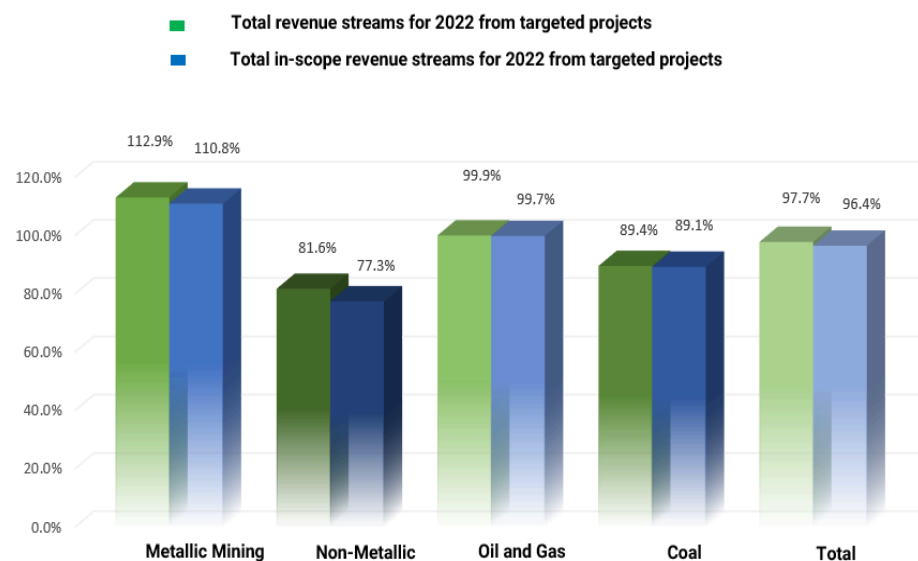

Table II-2. Aggregate data for revenue streams and other collections of targeted projects as reported by each government agency for the extractive industry segregated by sectors

Agency	Metallic mining	Non-metallic mining	Oil and gas	Coal	Total
BIR	16,475,205,130	10,056,537,955	6,580,816,191	No BIR waiver*	33,112,559,275
BOC	978,739,809	2,002,689,331	44,986,437	25,241,797	3,051,657,374
DOE	Not applicable	Not applicable	27,062,298,248	15,842,879,075	42,905,177,324
LGU	1,313,478,634	210,658,120	-	77,101,678	1,601,238,432

PPA	-	311,093,439	-	18,910,920	-	16,506	-	33,456,497	-	363,477,362
Subtotal	20,919,586,337	393,001,895	11,954,463,957	334,332,369	33,617,651,356	70,466,026	15,925,891,579	52,787,469	82,417,593,228	850,587,759
NCIP	105,273,850	-	-	-	-	-	-	-	105,273,850	-
Total	21,024,860,187	393,001,895	11,954,463,957	334,332,369	33,617,651,356	70,466,026	15,925,891,579	52,787,469	82,522,867,078	850,587,759

Figure II-2. Percentage representation of total revenue streams and total in-scope revenue streams from targeted projects

PhP83.4bn or 97.7% of the total revenue streams for 2022 from the extractive sector reported by government agencies is represented by the revenue streams from the targeted projects while PhP82.4bn or 96.4% is represented by the total in-scope revenue streams from the targeted projects. Figure 2 presents the breakdown of percentage representation for each respective sector.

Based on the percentages in Figure 2, it is assessed that the representation of the targeted projects and the corresponding revenue streams and other taxes that will be subjected to further reconciliation is inclusive of the extractive industry. However, similar to the previous

Table 4 discloses the percentage of total government collections from participating projects to total government collections in their respective sectors based on government submissions excluding reported amount for mandatory expenditures and funds and Royalty to IPs monitored by MGB and NCIP, respectively, because these are not considered collections by the government, but are only monitored.

Table II-4. Percentage representation of participating projects to total extractive sector based on government collections (excluding NCIP and MGB Funds)

(in PhP)			
Industry	Total government collections from extractive industry	Total government collections of participating projects	% of participating companies to total
Metallic Mining	18,790,188,710	20,733,058,801	110%
Non-Metallic Mining	13,332,358,878	11,966,038,193	90%
Oil and gas	33,708,886,177	33,688,117,381	99.94%
Coal	17,864,926,913	-	0%
Total	83,696,360,678	66,387,214,375	79%

The coverage for large-scale metallic mining sector is at 110%. Among the sixteen (16) non-participating metallic mining projects, only ten (10) are producing. Represented by the 46 non-metallic mining projects, the coverage for large-scale non-metallic mining sector is 90%. The coverage for the oil and gas sector is 99.4% represented by three (3) projects while for the coal sector, the lone target, Semirara Mining Corporation did not participate.

We have assessed the sufficiency of participation based on revenues reported by the government in 2022. The percentages presented in Table 4 leads to the assessment that participation for the Report is sufficient.

For additional details on the profile of targeted and participating projects, refer to page 69, Section III, Scope of the report.

B. Targeted and participating projects

Table 5 details the number of targeted and participating projects who were able to submit their templates.

Table II-5.1 Number of targeted and participating projects for the tenth report

Sector	Target	Participating Count	Participating %	Non-Participating Count	Non-Participating %
Metallic (producing)	45	35	78%	10	22%
Metallic (non-producing)					
Under care and maintenance	11	5	45%	6	55%
Metallic - Subtotal	56	40	71%	16	29%
Non-Metallic (producing)	56	45	80%	11	20%
Non-Metallic (non-producing)					
Under care and maintenance	3	1	33%	2	67%
Non-Metallic - Subtotal	59	46	78%	13	22%
Oil and Gas	5	3	60%	2	40%
Coal	1	0	0%	1	100%
Total	121	89	74%	32	26%

Table II-5.2 Number of targeted and participating companies for the tenth report

Sector	Target	Participating		Non-Participating	
		Count	%	Count	%
Metallic (producing)	47	36	77%	11	23%
Metallic (non-producing)					
Under care and maintenance	11	5	45%	6	55%
Metallic - Subtotal	58	41	71%	17	29%
Non-Metallic (producing)	34	25	74%	11	26%
Non-Metallic (non-producing)					
Under care and maintenance	3	1	33%	2	67%
Non-Metallic - Subtotal	37	26	70%	13	30%
Oil and Gas	5	3	60%	2	40%
Coal	1	0	0%	1	100%
Total	100	70	69%	31	31%

Targeted projects were based on nominations made by the MGB and DOE for the mining, oil and gas and coal sectors, respectively. This includes all operating metallic and non-metallic mining projects, whether producing or not, active oil and gas SCs in the production phase that has reported government share payments to the DOE and COC 5 operated by Semirara Mining and Power Corporation, the major player in the country's coal sector accounting for 99% of the country's coal production.

As presented in Table 5, out of 121 projects, 89 projects participated leading to the overall participation rate of 74% which is 11% higher compared to 2021 or 12 projects more. Non-metallic sector has the highest participation among the sectors at 78% participation rate which is 23% higher compared to 2021 or 19 projects more. Participation for the oil and gas sector increased by 1 project. For the metallic sector, however, there was a 11% decreased in participation or 8 projects less. Semirara Mining and Power Corporation, the lone target in the coal sector, remains to be a nonparticipant in the exercise for ten consecutive years despite continued communication and coordination with the company and the DOE, which is the lead government agency overseeing its operations.

In 2014, Semirara Mining and Power Corporation expressed their concern regarding the disclosure of their data on payments to the government which may be used against them in the global market, given the World Trade Organization (WTO) guidelines. Further, publishing their data might affect the company's cost and price competitiveness. The company also noted that the incentives they avail might be construed as government subsidy and may cause countries where they export to impose countervailing measures.

A letter signed by the MICC co-chairs, DENR and DOF Secretaries was transmitted in September 2015 to DOE seeking their assistance in requiring Semirara to participate. In January 2016, DOE sent a letter to Semirara encouraging them to participate in the PH-EITI exercise. DAO 2017-07 was issued in 2017 by DENR that mandates mining contractors to participate in the PH-EITI exercise. However, Semirara continuously insists that they are not covered by this administrative order and maintained their position not to participate in the exercise.

Notwithstanding the non-participation of Semirara Mining and Power Corporation, the following information on government share, real property taxes and income taxes were obtained from government's reporting template and the company's own audited financial statements:

Table II-6. Semirara Mining and Power Corporation tax payments for 2020

Agency	Revenue Stream	Amount	% to total reconciled revenue streams and other taxes of the entire extractive sector	% to total revenues streams and other taxes reported by government agency for the entire extractive sector
BIR	Corporate income tax	2,099,546,578	4.69%	2.51%
DOE	Government share in production	15,842,879,075	35%	19%
BOC	Customs duties	6,160,825	0.01%	0.01%
BOC	VAT on imported materials and equipment	19,076,761	0.04%	0.02%
BOC	Excise tax on imported goods	4,210	0.000009%	0.000005%
LGU	Local business tax	73,888,997	0.2%	0.1%
LGU	Real property tax - Basic	1,481,341	0.003%	0.002%
LGU	Real property tax - SEF	1,481,340	0.003%	0.002%
LGU	Mayor's permit	250,000	0.0006%	0.0003%
PPA	Wharfage Fees	33,456,497	0.1%	0.04%
Total		18,078,225,626	40.4%	21.6%

The above data are presented only as a matter of information and not subjected to reconciliation procedures due to Semirara's refusal to participate in the exercise. Nonetheless, if we are to directly compare disclosures made by the DOE based on their reporting template and Semirara Mining and Power Corporation's 2020 annual report, there is no noted significant variance to total government share from coal production of PhP15.8bn. The annual report may be accessed through its website at <http://www.semiramining.com>.

A comparison to the total revenue streams and other taxes of the entire extractive sector reported by government agencies was conducted as presented in Table 6. The total of government collections attributed to Semirara Mining and Power Corporation amounting to PhP18bn represents 58% and 56% of total reconciled revenue streams for mining and oil and gas, respectively, and 29% of the entire extractive sector. Accordingly, we have assessed revenue streams for coal to be immaterial in relation to total extractive sector as a whole and does not affect the comprehensiveness of the Report, however, PH-EITI continues to pursue Semirara as it primarily represents the local coal sector having 99.33% of the total coal production for 2022.

Table 7 presents the percentage representation of participating projects based on reported government collections per sector and the extractive industry taken as a whole.

Table II-7. Percentage representation of participating projects to total revenue streams reported by the government from the extractive industry

Sector	2022 Reported government collections	Total	% to total government collections
Metallic Mining	20,733,058,801	18,790,188,710	25%
Non-metallic Mining	11,966,038,193	13,332,358,878	14%
Oil and gas	33,688,117,381	33,708,886,177	40%
Coal	-	17,864,926,913	0%
Total	66,387,214,375	83,696,360,678	79%

The tenth PH-EITI Report concluded with 79% representation for the mining, oil and gas and coal sectors based on revenue streams and other taxes reported by government agencies. Without coal,

the combined percentage of participating projects from mining and oil and oil and gas sector would have reached 101%.

For additional details on the profile of targeted, participating, and non-participating projects, refer to discussion under Page 65, Section III, Scope of the report.

C. Government agencies

In addition to the seven (7) national government agencies, a total of 54 LGUs submitted templates for reconciliation as compared to 57 in the ninth PH EITI report. The details of these government agencies can be found in Page 65, Section III, Scope of the report.

D. Revenue streams and other taxes

The following tax payments and fees, as well as mandatory expenditures and funds, were included in this Report. A more detailed discussion on these revenue streams are included in Page 65, Section III, Scope of the report.

Taxes and fees

1. Corporate income tax
2. Customs duties
3. Excise tax on minerals
4. Government share from oil and gas production
5. Local business taxes
6. Output Vat
7. Real property tax – Basic
8. Real property tax – Special Education Fund (SEF)
9. Royalty on mineral reservation
10. Value added tax on importations
11. Withholding tax on foreign shareholder dividends
12. Withholding tax on profit remittance to principal
13. Withholding tax on royalties to claim owners

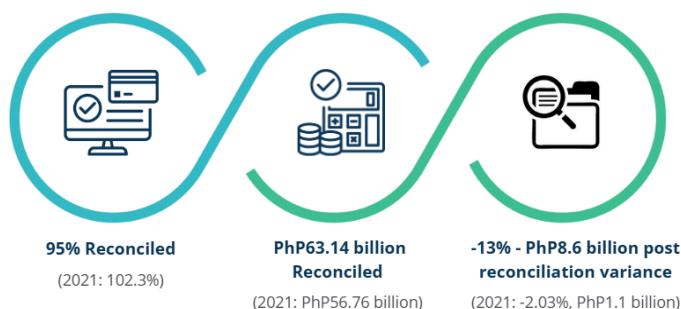

Other taxes

1. Royalty to Indigenous Peoples (IPs)

Mandatory expenditures and funds

1. Annual Environmental Protection and Enhancement Program (AEPEP)
2. Annual Safety and Health Program (ASHP)
3. Annual Social Development Management Program (ASDMP)
4. Environmental Trust Fund
5. Final Mine Rehabilitation and Decommissioning Fund
6. Compensation for claims for damages from Mine Waste and Tailing Fees
7. Mine Waste and Tailings Fees (MWTF)
8. Monitoring Trust Fund
9. Rehabilitation Cash Fund

E. Final output preview

Based on the results of reconciliation procedures performed, total reconciled revenue streams and other taxes for 2022, excluding royalty to IPs and mandatory safety and health, environmental and social expenditures, amounted to PhP63.14bn or 95% reconciled with -13% remaining unreconciled variance. Royalty to IPs and the mandatory expenditures were excluded since these are not considered revenue by the government, but are only monitored by the corresponding government agencies. Table 8 summarized the results of reconciliation and the details are presented in page 90, Section IV, Reconciliation results.

Table II-8. Summary of reconciliation results (including non-participating projects)

	Project amount	Government agency amount***	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance*	% Reconciled*

*Percentage of variance post-reconciliation to collections reported by government agency

**Percentage of reconciled amount to collections reported by government agency

***The government agency amounts and variance pre-reconciliation and post-reconciliation includes unilateral disclosures for in-scope revenue streams reported by government agencies for non-participating entities amounting to PhP160m for the metallic mining sector, PhP2m for the non-metallic mining sector and PhP87m for the oil and gas sector. Refer to Section III, Reconciliation results overview, of this chapter for the details of unilateral disclosures

If revenue streams reported by government agencies of non-participating projects were excluded, the percentage of reconciled amount would increase by 2% or and percentage of variance post-reconciliation would be to -13.2%. Table 10 presents the summary of reconciliation results excluding data on non-participating projects.

Table II-9. Summary of reconciliation results (excluding non-participating projects)

*Percentage of variance post-reconciliation to collections reported by government agency

**Percentage of reconciled amount to collections reported by government agency

Similar to prior year's report, NCIP was only able submit partial data. Given the minimal amount of NCIP's submission, the percentage reconciled and percentage variance for NCIP was based on the total amount reported by the projects. Supporting documents were obtained from participating projects to arrive at the reconciled amount. This procedure was adopted in recognition of the constraints faced by the NCIP in monitoring royalties which are, by law, paid by projects directly to the concerned IPs who are private parties. IP royalties are, therefore, not considered government revenue, but they are mandatory. While the NCIP is responsible for protecting the rights of the IPs of the Philippines, including their right to receive royalties, it is not a collecting agency. Moreover, it has

had to deal with complex and serious challenges in and to its organization, including its budget. Thus, there has been considerable difficulty in getting data on IP royalties from the NCIP, even from its regional offices, most of which do not have ready access to the data themselves. The PH-EITI has put forward and followed up recommendations to help address the gaps in transparency in the NCIP, including developing a monitoring tool and conducting capacity-building activities with the agency and its stakeholders. The efforts continue. Refer to page 146 , Section VIII, Recommendations.

Table II-10. Percentage of reconciled revenue streams to total sector collections reported by government agencies and to total in-scope collections reported by government agencies (excluding NCIP and MGB funds)

	Metallic mining	Non-metallic mining	Oil and gas	Total
Total reconciled revenue streams	19,304,602,227	11,779,065,031	32,060,683,934	63,144,351,191
Total sector revenue streams reported by government	18,790,188,710	13,332,358,878	33,708,886,177	65,831,433,765
Percentage reconciled to total sector revenue streams	103%	88%	95%	96%
Total in-scope revenue streams reported by government	20,919,586,337	11,954,463,957	33,617,651,356	66,491,701,649
Percentage reconciled to total in-scope revenue streams	92%	99%	95.4%	95%

Based on the submissions provided by the individual government agencies on collections made from metallic, non-metallic and oil and gas sectors, percentage reconciled for participating metallic, non-metallic, and oil and gas projects for 2022 are at 103%, 88% and 95.1% (2021 – 100.09%, 101.45% and 98.19%), respectively. When scoped-out revenue streams are excluded, percentages are at 92%, 99%, and 95.4% for the metallic, non-metallic, and oil and gas sectors, (2021 – 101.5%, 107.49%, and 100%), respectively.

Note that NCIP is only tasked to monitor royalty for IPs, not to collect on their behalf; thus, consistent in previous reports, royalties for IPs are considered as 'other taxes' and not a revenue stream of the government. Likewise, MGB funds are payments made by the projects to ensure availability of financing for activities ranging from social development, environmental protection, and rehabilitation, and do not form part of the government revenue collections.

Although the percentage of reconciled revenues to in-scope reported government collections did not exceed a hundred percent (100%) for the all sectors when compared to the ninth report, the data submitted by Bureau of Local Government Finance (BLGF), the agency that collects and monitors the data pertaining to the LGUs, is considered inadequate. There were still instances where direct payments from projects to LGUs were not reflected in the ENRDMT. However, the projects were able to provide the necessary supporting documents; thus, these payments were considered reconciled. Consequently, the reported government collection is lower when compared to the payment reported by the project causing the percentage reconciled to exceed 100% as presented in Table 14.

Presented in the Table 11 are the percentages without LGU data.

Table II-11. Percentage of reconciled revenue streams and other taxes to total sector collections reported by government agencies and to total in-scope collections reported by government agencies (excluding LGU, NCIP, MGB funds)

	Metallic mining	Non-metallic mining	Oil and gas	Total
Total reconciled revenue streams	17,948,318,054	11,194,989,722	32,060,332,423	61,203,640,200
Total sector revenue streams reported by government	17,453,916,043	12,822,983,165	33,708,886,177	65,831,433,765
Percentage reconciled to total sector revenue streams	103%	87%	95%	93%
Total in-scope revenue streams reported by government	19,630,042,981	11,744,411,186	33,617,651,356	64,992,105,522
Percentage reconciled to total in-scope revenue streams	91%	95%	95%	94%

Tables below break down the percentages in Table 10 by government agencies.

Table II-12. Percentage reconciled revenue streams and other taxes of projects to total sector revenue streams and other taxes reported by government

Agency	Metallic mining	Non-metallic mining	Oil and gas	Total
BIR	116%	92%	75%	99%
BOC	94%	66%	3%	73%
DOE	N/A	N/A	100.1%	100.1%
LGU	101%	115%	127%	105%
MGB	48%	N/A	N/A	48%
Total	103%	88%	95%	96%

Table II-13. Percentage reconciled revenue streams and other taxes of projects to the total in-scope collections reported by government

Agency	Metallic mining	Non-metallic mining	Oil and gas	Total
BIR	97%	100.1%	76%	94%
BOC	83%	70%	11%	74%
DOE	N/A	N/A	100.1%	100.1%
LGU	105%	278%	0%	129%
MGB	53%	N/A	N/A	53%
Total	92%	99%	95%	95%

Aside from LGU, DOE also posed a percentage reconciled a little over 100% as indicated in Table 14. This was due to a project whose taxable year is fiscal, but the data submitted by DOE is for the calendar year 2022. The reconciled amount is based on then fiscal period of the project. Table 15 sets out the details of reconciliation per agency.

Table II-14. Summary of reconciliation results per agency

Agency	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Reconciled	% Variance	% Variance to total government agency amount
BIR	41,211,988,691	32,825,222,399	(8,386,766,292)	30,782,538,675	(8,710,794,476)	94%	-27%	-13%
BOC	2,864,585,819	2,870,513,655	5,927,836	2,132,765,725	41,687,086	74%	1%	0.1%
DOE	11,487,158,138	27,062,298,248	15,575,140,111	27,096,587,500	-	100.1%	0%	0%
LGU	2,109,262,224	1,499,596,127	(609,103,490)	1,940,710,992	598,524	129%	0.04%	0.001%
MGB	2,214,154,956	2,234,071,221	19,916,264	1,191,748,299	45,387,950	53%	2%	0.1%
Total	59,887,149,828	66,491,701,649	6,605,114,428	63,144,351,191	(8,623,120,916)	95%	-13%	-13%
NCIP	646,470,259	105,273,850	(541,196,409)	404,194,673	(105,647,089)	63%	-16%	-0.2%

DOE registered no unexplained variances to total government reported amounts. This is expected for DOE given that there are fewer participants compared to the mining sectors and only one revenue stream. The remaining agencies unexplained variances to total government reported is mainly attributed to absence of supporting documents due to lack of response from the projects. Although LGU have a low percentage of unreconciled variance, it is important to note that the submitted data is incomplete. Due to the insufficient data from LGU, supporting documents were obtained from participating projects to support the amount they have disclosed. Refer to page 213, Section VII, Variances and discrepancies for additional details.

Table 15 summarizes the percentage contribution of each government agency to the total reconciled revenue streams and other taxes.

Table II-15. Percentage contribution of each agency to reconciled total collections and receipts

	Metallic Mining	Non-metallic Mining	Oil and gas	Total	% contribution to total reconciled
BIR	15,945,463,113	9,874,731,359	4,962,344,202	30,782,538,675	48%
BOC	811,106,642	1,320,258,363	1,400,721	2,132,765,725	3%
DOE	not applicable	not applicable	27,096,587,500	27,096,587,500	43%
LGU	1,356,284,173	584,075,309	351,511	1,940,710,992	3%
MGB	1,191,748,299	not in scope	not applicable	1,191,748,299	2%
NCIP	404,194,673	2,155,734	not applicable	406,350,407	1%
Total	19,708,796,900	11,781,220,765	32,060,683,934	63,550,701,598	100%

The figure below shows the sector distribution of the total reconciled revenue streams for 2022.

Figure II-3. Industry sector distribution of total reconciled revenue streams for 2020

Oil and gas sector remains to be the biggest contributor to the reconciled revenue stream and other taxes with 51% or PhP32bn total reconciled revenue stream and other taxes (2021 - PhP22.8bn, 40.2%) followed by the metallic sector with 31% or PhP19.3bn (2021 - 39.7% or PhP22.5bn) and non-metallic sector with 19% or PhP11.8bn (2021 - PhP11.4bn, 20%).

Figure II-4. Proportion of reconciled revenue streams for the extractive sector

Similar to previous reports, payments to the DOE and BIR are the most significant revenue streams, which account for approximately 43% or PhP27.1bn and 48% or PhP30.8bn (2021 - 37% or PhP21bn and 50% or PhP29bn), respectively, of total reconciled revenue streams. This observation was not expected to change this Report in the absence of any amendments to the fiscal regimes of both sectors. Consistently, revenue streams attributed to the said agencies and their corresponding percentage to total reconciled amount in 2022 are composed of government share in oil and gas operations (PhP27.1bn, 43%), corporate income tax (PhP14.5bn, 23%), output VAT (PhP8.6bn, 14%), and excise tax on minerals (PhP6.3bn, 10%) as presented in Figure 4

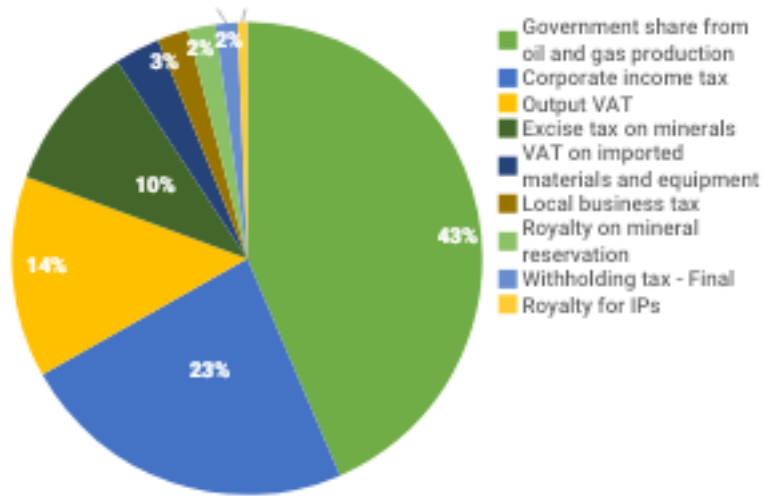

Figure II-5. Proportion of reconciled revenue streams for the mining sector

Focusing on the mining sector, corporate income tax, excise tax on minerals and output VAT remains to be the main contributors amounting to PhP9.1bn or 33%, PhP6.3bn or 22% PhP8.6bn or 29% (2021 - PhP10.7bn or 36%, PhP6.2bn or 21% PhP6.4bn or 22%), respectively as presented in Figure 5. Limestone operators were the biggest contributors to the BIR revenue streams with payments amounting to PhP9.6bn or 37% (2021 - PhP3.8bn, 15%) which included payments from Eagle Cement (PhP4.2bn) and Republic Cement Buildings and Materials (PhP2.8bn), and Northern Cement (PhP1.3bn). Another significant portion of the reconciled BIR revenue streams are provided by nickel operators contributing PhP8.1bn or 33% of total BIR collections in 2022 (2021 - PhP10.8bn, 42%). These include BIR payments of Taganito Mining (PhP2.4bn), Rio Tuba Nickel Mining Corp. (PhP1.3bn), Eramen Minerals, Inc. (PhP777m), and Platinum Group Metals Corporation (PhP761m). Similar to prior years, for the oil and gas sector, government share from oil and gas production was the highest contributor with PhP21bn or 87% (2021 - with PhP21.1bn or 93%) share in total revenue streams, respectively. Prime Energy Resources Development B.V., operator of SC38, contribution amounted to PhP26.9bn or 99% to the government share from oil and gas production.

Focusing on the mining sector, corporate income tax, excise tax on minerals and output VAT remains to be the main contributors amounting to PhP9.1bn or 33%, PhP6.3bn or 22% PhP8.6bn or 29% (2021 - PhP10.7bn or 36%, PhP6.2bn or 21% PhP6.4bn or 22%), respectively as presented in Figure 5. Limestone operators were the biggest contributors to the BIR revenue streams with payments amounting to PhP9.6bn or 37% (2021 - PhP3.8bn, 15%) which included payments from Eagle Cement (PhP4.2bn) and Republic Cement Buildings and Materials (PhP2.8bn), and Northern Cement (PhP1.3bn). Another significant portion of the reconciled BIR revenue streams are provided by nickel operators contributing PhP8.1bn or 33% of total BIR collections in 2022 (2021 - PhP10.8bn, 42%). These include BIR payments of Taganito Mining (PhP2.4bn), Rio Tuba Nickel Mining Corp. (PhP1.3bn), Eramen Minerals, Inc. (PhP777m), and Platinum Group Metals Corporation (PhP761m). Similar to prior years, for the oil and gas sector, government share from oil and gas production was the highest contributor with PhP21bn or 87% (2021 - with PhP21.1bn or 93%) share in total revenue streams, respectively. Prime Energy Resources Development B.V., operator of SC38, contribution amounted to PhP26.9bn or 99% to the government share from oil and gas production.

Figure II-6. Proportion of reconciled revenue streams for the oil and gas sector

Similar to prior years, for the oil and gas sector, government share from oil and gas production was the highest contributor with PhP21bn or 87% (2021 - with PhP21.1bn or 93%) share in total revenue streams, respectively. Prime Energy Resources Development B.V., operator of SC38, contribution amounted to PhP26.9bn or 99% to the government share from oil and gas production.

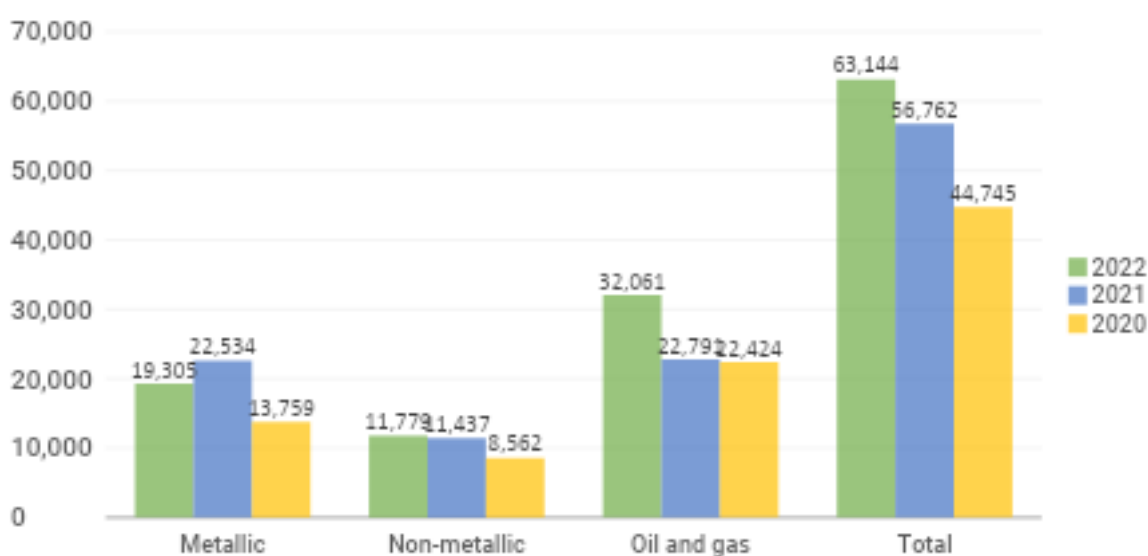

Similar to prior years, for the oil and gas sector, government share from oil and gas production was the highest contributor with PhP21bn or 87% (2021 - with PhP21.1bn or 93%) share in total revenue streams, respectively. Prime Energy Resources Development B.V., operator of SC38, contribution amounted to PhP26.9bn or 99% to the government share from oil and gas production.

Table II-16. Summary of total reconciled revenue streams in 2022, 2021, and 2020

Industry Sector	2022	2021	2020	Change (2022 vs 2021)	% change	Change (2022 vs 2020)
Metallic	19,304,602,227	22,534,353,067	13,759,099,190	(3,229,750,840)	-17%	5,545,503,037
Non-metallic	11,779,065,031	11,436,796,093	8,562,242,462	342,268,938	3%	3,216,822,569
Oil and gas	32,060,683,934	22,790,939,656	22,423,835,783	9,269,744,278	29%	9,636,848,151
Total	63,144,351,191	56,762,088,816	44,745,177,434	6,382,262,375	10%	18,399,173,757

Figure II-7. Summary of total reconciled revenue streams in 2022, 2021 and 2020 (in millions)

The reconciled revenue and other taxes for the extractive industry in 2022 increased by 10% and 29% compared to 2021 and 2020, respectively. The biggest contributor to this increase is the reconciled revenue streams for DOE of the oil and gas sector with a 22% or PhP5.9bn and 36% or PhP9.6bn increase compared to 2021 and 2020. 29% and 30% increase when compared to 2021 and 2022 is attributed to the oil and gas sector. Aside from DOE, revenue streams for BIR also increased by 67% or PhP3.3bn when compared to 2021. This increase in 2022 is brought about by the increase in the oil prices and demand as well. Given that the oil and gas sector is the largest contributor in the extractive industry, the sector will dictate the movement in the revenue streams and other taxes. As presented in Figure 7, the movement of oil and gas sector is directly proportional to the movement in the total extractive industry.

Metallic mining sector contributed to a 17% decrease when compared to 2021, but 29% increase when compared to 2020. The negative change from 2021 to 2022 is due to the decrease in reconciled revenue streams for BIR and MGB. Reconciled revenue streams for BIR were lower by 12% or PhP1.9bn while reconciled streams for MGB were lower by 98% or PhP1.2bn. The reconcile revenue streams is expected to go down compare to 2021 due to lower prices of some metals, but not by as much as 17%. Absence of supporting schedules and documents was the main cause for this decrease. On the other hand, BIR contributed to the positive change from 2020 to 2022 with reconciled revenue streams increasing by 36% or PhP5.7bn. Effects of COVID-19 pandemic was deeply felt in 2020.

Non-metallic sector contributed to a 3% and 27% increase when compared to 2021 and 2020. Comparing 2021 and 2022, revenue streams of BIR and LGU both increased by 5% or PhP476m and 18% or PhP107m, respectively. For 2020, on the other hand, there was an increase in revenue streams of BIR, BOC and LGU by 25% or PhP2.4bn, 38% or PhP496m and 47% or PhP275m, correspondingly.

A. *Mandatory social and environmental expenditures*

Mandatory expenditures are not remitted to agencies and do not form part of government coffers, but are primarily incurred for the benefit of host communities and protection and preservation of impacted areas. These payments were also subjected to similar reconciliation procedures applied to other revenue streams, including inspection of supporting documents and discussions with management for variances noted; however, the data submitted by MGB, the government agency responsible for monitoring these expenditures, was insufficient, but a significant improvement compared to the agency's data submission in the sixth report. Similar to NCIP, since these expenditures are not revenue streams of the government, supporting documents were obtained from participating projects to arrive at the reconciled amount.

Table II-17. Summary of results of reconciliation for social and environmental expenditures

Actual social and environmental expenditures	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation
Metallic mining					
Annual EPEP - Actual Expenditure for the Year (PhP)	2,512,937,673	-	(2,512,937,673)	641,102,678	(1,868,414,467)
Annual Work and Financial Plan (WFP) for FMR/DP - Actual expenditure	34,419,040	-	(34,419,040)	-	(34,419,040)
Compensation for claims for Damages from MWTF - Actual expenditure	-	-	-	-	-

Rehabilitation Cash Fund - Actual Expenditures - Withdrawn from the Fund	6,958,677	-	(6,958,677)	-	(6,958,677)
Subtotal - Environmental expenditure	252,302,528	64,105	(252,238,423)	12,384,572	(239,874,890)
Safety and Health Programs - Actual expenditure	84,499,892	-	(84,499,892)	17,244,480	(78,989,488)
Annual SDMP - Social Development and Management Programs					
DHNC - Development of Host and Neighboring Communities	68,447,030	53,627,283	(14,819,747)	28,936,514	(13,775,966)
DMTG - Development of Mining Technology and Geosciences	8,438,329	6,401,404	(2,036,924)	3,920,484	(2,044,158)
IEC - Information, Education & Communication	12,954,161	10,749,848	(2,204,314)	7,495,717	(2,214,607)
Subtotal - Annual SDMP	89,839,520	70,778,535	(19,060,985)	40,352,714	(18,034,731)
Subtotal - Non-metallic mining	426,641,940	70,842,639	(355,799,301)	69,981,766	(336,899,109)
	4,617,893,923	1,134,635,491	(3,483,258,432)	1,545,827,249	(2,699,934,240)

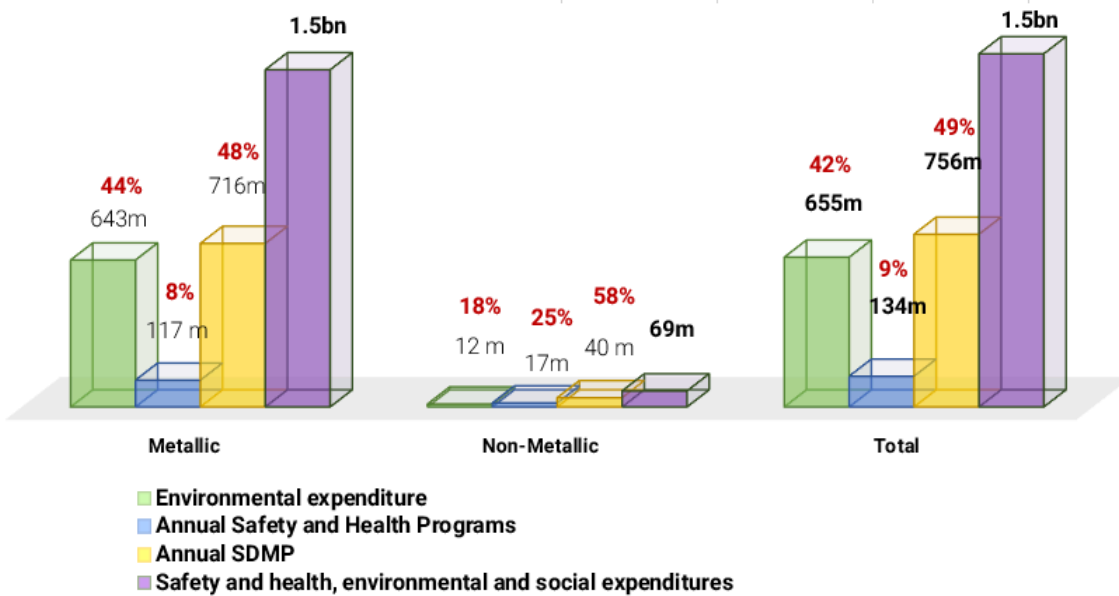

Total reconciled safety and health, environmental and social expenditures of participating mining projects for 2022 amounted to Ph₱1.5bn (2021 - Ph₱1.6bn) which is 5.3% of reconciled mining revenue streams (2021 – 4.7%). This is lower by 2% or Ph₱32.6m compared to 2021.

Initial comparison of disclosures made by MGB and participating mining projects presented a negative variance of Ph₱3.5bn (2021 - Ph₱4.5bn). After obtaining supporting documents from participating projects, total discrepancy resulted in Ph₱2.7m (2021 - Ph₱2.9m). The remaining variance pertains to participating projects that were not able to provide the necessary supporting documents.

Given the higher reported amount of participating projects, it is evident that there is still a lack of information in the central office. This could possibly be due to either non-reporting of regional offices to the central office since participating projects were able to provide reports received by the respective regional MGB offices or central office's failure to monitor the submissions from the regional offices.

Figure 8 shows distribution of reconciled environmental, safety and health, and social expenditures of participating mining projects for FY2022.

Figure II-8. 2022 Safety and health, environmental and social expenditures

Safety and health. 9% or PhP134m (2021 - 20% or PhP310m) of the 2022 mandatory expenditures is incurred for standard operating procedures for mining and milling operations, management and employee training, housekeeping, environmental risk management including emergency response program and occupational health and safety management. 87% or PhP117m (2021 - 90% or PhP279m) and 13% or PhP17m (2021 - 10% or PhP31m) of the total reconciled annual safety and health program was spent by the metallic and non-metallic sector, respectively.

Environmental protection. Of the total mandatory expenditures incurred by participating mining projects in 2022, 42% or PhP655m pertain to environmental protection and rehabilitation such as reforestation based on reported EPEP (2021 - 28% or PhP449m). The metallic and non-metallic sectors contributed 98% or PhP643m (2021 - 86% or PhP385m) and 2% or PhP12m (2021 - 14% or PhP64m) to the total reconciled mandatory expenditure for environmental protection, respectively.

Social development. Total expenditures on social development amounted to PhP756m or 49% of the total reconciled mandatory expenditures (2021 - PhP819m or 52%). PhP716m or 95% (2021 - PhP784m or 96%) pertains to metallic sectors' spending while only PhP40m or 5% (2021 - PhP34m or 4%) applies to the non-metallic sector. These represent activities undertaken as part of participating projects' SDMP, which must be equivalent to 1.5% of operating expenses as mandated by existing regulations. Any difference between required and actual expenditures in a given year may be carried forward to the succeeding period as long as it is within the five year program approved by the MGB.

II. Methodology

Below is an overview of the approach and methodology, primarily divided into five (5) phases as follows:

A. Scoping and finalization of reporting templates

The reporting cycle begins with identifying the scope of the report in terms of projects, government agencies, revenue streams and other taxes, as well as additional information determined by stakeholders that would aid in gaining further understanding of the local extractive industries. Simultaneously, templates to standardize presentation of information and data are prepared and finalized, as well as identifying required sign offs on behalf of projects and agencies. Similar to the previous PH-EITI reports, the data for FY2022 were gathered using reporting templates tailored and approved by MSG.

B. Data gathering

Data submission from reporting projects and some government agencies were made through PH-EITI's Online Reporting in the Extractives (ORE) Tool. The MSG-approved reporting templates were integrated into the ORE Tool to which reporting projects had access from May 20, 2024 to July 21, 2024. Submissions after this date until August 9, 2024 were manually prepared and submitted for reconciliation. ORE was made available to all targeted projects and government agencies particularly the Mines and Geosciences Bureau, Department of Energy, Bureau of Customs, Department of Budget and Management and the National Commission on Indigenous Peoples. The Bureau of Internal Revenue submitted data separately while data submissions from local government units were submitted through the Bureau of Local Government Finance's Environment and Natural Resources Data Management Tool (ENRDMT).

The following guidelines were stated in the reporting templates and were explained to reporting projects and government agencies during the ORE Reporting Tool briefing and various MSG meetings:

- **Comprehensive disclosures:** Reporting entities should include all revenue streams attributed to the taxable year 2021, regardless of settlement or payment periods. This extends to cases where an alternative fiscal year-end, such as June 30, is adopted. The accrual basis of accounting is prescribed for accurate representation.
- **Total taxes and breakdown:** Templates must present the total taxes for the year, with supporting schedules detailing the breakdown. This breakdown should provide the required level of detail, considering factors like frequency and receiving office, to address any variances noted.

- **Authorized signatories:** The templates should be signed by senior management representatives, such as the President, Chief Finance Officer, or any equivalent personnel for companies involved in participating projects.

To establish credibility of the data, the MSG considered availability and accessibility of information including the appropriate level of management who will attest to the accuracy of the data. With these factors in mind, the credibility of data was established through the following:

- Reporting templates were submitted by either the President of the Company for the respective project and/or Chief Financial Officer, and Department Head for the government agencies via the ORE Tool.
- Traceability of information to the audited financial statements, as applicable. Refer to page 144, Section VII, Audit procedures for the discussion on the audits being performed by an independent third party and COA on the financial statements of the respective companies of the projects and government agencies, respectively.

Like the previous PH-EITI reports, reconciliation was also limited by the prevailing confidentiality clause under the NIRC, which restricts the BIR to disclose tax payments of companies of the participating projects unless signed waivers are submitted. Projects who failed to submit their corresponding waivers were considered as non-participating.

The first PH-EITI report includes a comprehensive discussion on the concepts of public disclosure, information, and participation. More specifically on confidentiality, the following rules apply to the mining and oil and gas sectors.

CONFIDENTIAL	NON-CONFIDENTIAL
<p>The information is confidential if It should not be divulged to the public but may be used internally by the DENR-MGB Director or his authorized representatives for monitoring, policy planning, and research.</p>	<p>The information may be made available and reproduced by the public upon submission of appropriate requests to the DENR-MGB.</p>
<p>Example:</p> <ul style="list-style-type: none"> ● Information supplied by mining contractors to DENR as part of the investment guarantee ● Information agreed upon by the parties in the negotiations is confidential 	<p>Example:</p> <ul style="list-style-type: none"> ● Documents not covered by a valid confidentiality agreement between the parties ● Production and sales of minerals ● Employment, royalty and tax payments ● Metallic and non-metallic reserves ● Operational parameters, such as mining and capacities and rates, mine and mill recoveries dilution factors, etc. ● Other data agreed upon by the parties.

C. Materiality

The determination of materiality is primarily guided by monetary values and by whether these revenue streams are considered as main sources of receipts, as confirmed by the collecting government agencies.

Consistent with the previous PH-EITI Reports, the determination of materiality level for the tenth PH-EITI Report was done on a per extractive industry sector basis which provided for a uniform monetary threshold and a greater focus on key revenue streams relative to the total revenues per sector. The materiality threshold was calculated using 2% applied to the total revenues collected per sector as reported by the different government agencies. The 2% was benchmarked on the proposed regulatory threshold to be imposed by the Philippine Securities and Exchange Commission (SEC) on public companies. Presently, the threshold is at 5%, which if applied will result in fewer revenue streams to be covered. Hence, the adoption of a lower threshold was deemed more prudent and will enable greater and expanded scope.

In addition, the nature of the payments based on their relevance and significance to communities and operations was also considered. Thus, withholding tax on foreign shareholders, withholding tax on royalties to claim owners, real property taxes, and mandatory expenditures and social funds were included regardless of their amounts.

In-scope and Scope-out revenue streams, and other taxes for this Report are presented in Table 22.

D. Reconciliation

i. Agreed upon procedures

The objectives of the reconciliation process do not extend to an audit and review of the disclosures that were already subjected to the verification of third parties (e.g., independent auditing firms, and COA). Hence, agreed upon procedures (AUP) in accordance with the Philippine Standard on Related Services No. 4400, Engagements to Perform Agreed-upon Procedures regarding Financial Information, was determined to be appropriate. The end result of an AUP is a report on factual findings specifically on variances identified, if any, and reasons thereof, with no assurance expressed or issued.

The AUP are as follows:

- Revenue streams above the threshold set were selected, and the differences were calculated. Refer to the Determination of Materiality subsection of this section for the details of the in-scope revenue streams.
- Variances between the amounts disclosed by participating projects and the amounts disclosed by the corresponding government agencies were subjected to additional procedures, including direct discussions with management to identify possible reasons and explanations for these differences, as well as tracing sample transactions through the corresponding supporting documents to confirm the validity and accuracy of the disclosures made.

Revenue streams, expenses, and funds that were only disclosed by participating projects but had no corresponding disclosures from the government agencies due to legal restrictions (such as the absence of a confidentiality waiver), and those cases which lacked available information (i.e., reports are not readily available at the government agency's central office), were reconciled through other available supporting documents, including tax returns, payment vouchers, invoices, and others.

ii. Threshold of amount that will be reconciled

For each in-scope revenue stream indicated in Table 22, the total variance will be communicated to both the project and government agency to facilitate the compilation of detailed supporting schedules and additional documents (e.g., official receipts, bank statements). Any reconciling item that remained unsupported and unexplainable was declared as variance post reconciliation.

Lastly, we also referred to the following documents as additional references:

- FY2022 audited financial statements, if available, as these include relevant disclosures in compliance with Revenue Regulation No. 15-2010. This regulation requires the presentation of all applicable taxes made, including corporate income, excise and business taxes, duties, and other payments; and
- Annual reports for listed entities that ascertain transparency on community development programs; and other reports gathered by the EITI Secretariat from various agencies for scoping purposes.

III. Scope of the report

A. Targeted projects

A preliminary list of projects from the extractive industry was used by the MSG in assessing the scope of the reconciliation procedures. The list was based on the records of MGB and DOE of all companies with corresponding approved licenses and permits in 2022.

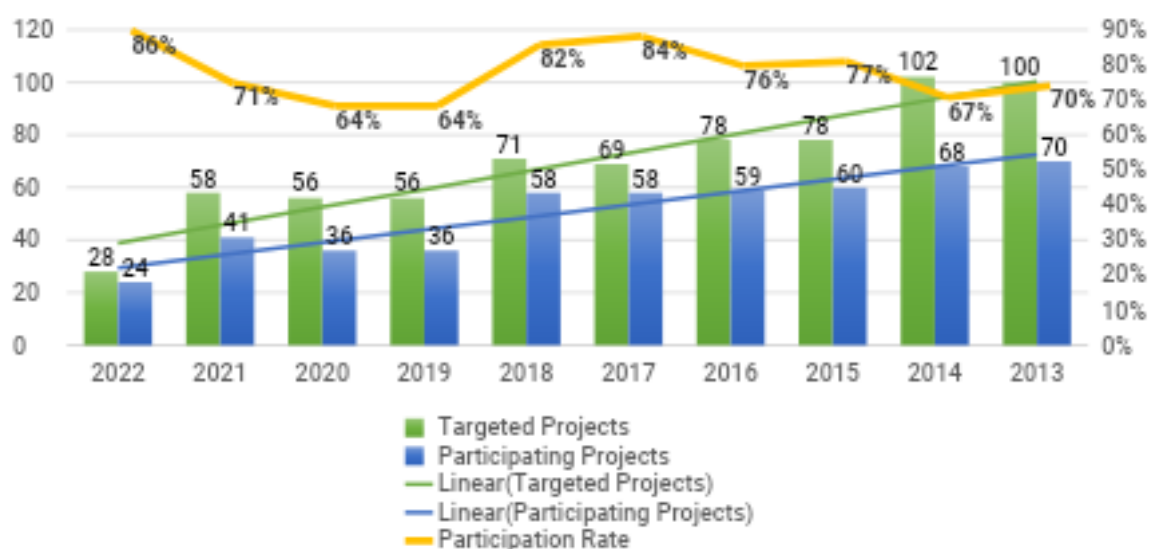

The MSG decided to identify the reporting company from the extractive industry based on their respective projects and will be referred to as “projects” throughout this chapter. Presented below are the decisions of MSG for each sector from the extractive industry:

Extractive Industry	MSG Decision
Large-scale mining (metallic and non-metallic)	Encompass all operating projects identified by the MGB
Oil and gas	Producing service contracts identified by DOE
Coal	Key player/s of the sector based on data provided by DOE

The preliminary list for 2022 provided by the respective government agency included 55 large-scale metallic mining, 59 large-scale non-metallic, five (5) oil and gas, and one (1) coal company.

Despite the issuance of DAO 2017-07, which mandates mining operators to participate in PH-EITI, the MSG acknowledged that participation may not reach 100%. Presented in Figure 9 are the rates of participation from 2013 to 2022 based on the count of companies. Companies instead of projects were used in order for the data to be comparable across the previous PH-EITI Reports.

Figure II-9. Rate of Participation from FY2013 –FY2022

Based on Figure 9, the participation is consistently increasing except for FY2014, FY2019, and FY2021, where the increase in the number of participating companies was not proportionate to the increase in the total number of targeted companies as presented below:

<i>Fiscal Year</i>	<i>Targeted</i>	<i>Participating</i>
<i>FY2013 to FY2024</i>	30	17
<i>FY2018 to FY2019</i>	9	1
<i>FY2020 to FY2021</i>	24	8

In 2022, only the participation for the metallic sector decreased by 11% which is mainly due to companies failing to meet the deadline of submission of required documents. The participation for non-metallic sector and oil and gas, on the other hand, increased by 14% and 42%. For the non-metallic sector, it was in FY2020 where all large scale non-metallic mining projects were targeted for participation; thus there are projects who were invited to join the exercise for the first time causing low participation of 56% compared to FY2021 at 70% participation. Meanwhile, for the oil and gas sector, the targeted companies decreased by six (6) and participating companies increased by one (1) which caused the higher participation in FY2021 compared to FY2020. Nonetheless, the overall participation increased by 3%. Accordingly, the MSG believes that the rate of participation for each year is an adequate representation of extractive sector.

Companies of respective targeted projects were required to submit data through the Online Reporting in the Extractives (ORE) Tool. Discussion of the development of the reporting template is included on Page 84, Methodology.

Tables 18 and 19 detail the targeted projects for metallic mining and non-metallic mining, respectively, with 2022 information on the production value obtained from MGB and government collections reported by the different government agencies and identify those that submitted reporting templates. Table 19, on the other hand, shows the targeted oil and gas projects and their corresponding 2022 reported sales and reported government collections by the government agencies and identified those that submitted reporting templates.

Table II-18. Targeted and participating metallic mining projects

Project	Company	2022 Production	% to total production	2022 reported government collections by government agency	% to total reported government collections for the sector	Participating (Yes/No)	
1	MOA by and between DENR and PMDC (Parcel 1)	AAM-Phil Natural Resources Exploration and Development Corporation	-	0%	17,775,338	0.09%	No

Out of the total targeted 56 large-scale metallic mining projects, 40 participated, three (3) were under care and maintenance, five (5) had an incomplete submission, and eight (8) did not respond to request for submission of reporting templates. The rate of participation based on government collection and production value are 113% and 98%, respectively, which the MSG considers as sufficient representation of the metallic sector. Refer to page 51, Section I, Executive Summary, for the breakdown of targeted and participating projects.

*production lines between the projects cannot be segregated

**reported under metallic mining sector as well

Out of the total targeted 59 large-scale non-metallic mining projects, 46 participated. The rate of participation based on government collection and production value are 92% and 96%, respectively, which the MSG considers as strong representation of the non-metallic sector.

Rio Tuba Nickel Mining Corporation also operates a non-metallic mining project as shown in Tables 18 and 19. In presenting the results of reconciliation in this chapter, the revenue streams of Rio Tuba Nickel Mining Corporation will be presented under metallic mining and will pertain to both the results of its metallic and non-metallic operations unless the data can be accurately divided between the metallic and non-metallic sector.

Table II-20. Targeted and participating oil and gas

	Company	Project	2022 Sales	% to total sales	2022 reported government collections by government agency	% to total reported government collections for the sector	Participating (Y/N)
1	Forum Exploration, Inc.	SC 40	-	0%	-	0%	N

2	NPG Pty Ltd	SC 14C1	2,534,770,161	3%	398,330,036	1%	Y
3	Prime Energy Resources Development B.V.	SC 38	74,426,370,531	97%	859,855,482	3%	Y
4	Philippine National Oil Corporation (PNOC) - Exploration Corporation	SC 37	-	0%	32,429,931,863	96%	Y
5	The Philodrill Corporation	SC 14C2	-	0%	-	0%	N
			76,961,140,692	100%	33,688,117,381	99.94%	

Three (3) out of five (5) targeted oil and gas projects participated in this year's exercise which accounted for 100% of the sector's sales and 99.94% of the total reported government collection for sector.

COC No. 5 of Semirara Mining and Power Corporation, the lone target project for the coal sector, did not participate. As done in prior reports, more than sufficient effort was exerted including direct email correspondences with Semirara and formal letter sent by the DOF to the DOE for assistance. Alternative procedures were then conducted to present information on Semirara's revenue streams including obtaining public documents such as audited financial statements and unilateral disclosures by the government agencies. These were included and presented in Section I, Executive Summary, of this chapter.

Table 21 summarizes the non-participating projects of the extractive sector with corresponding 2020 government collections reported by different government agencies.

The revenue streams reported by government agencies of the non-participating metallic mining projects for 2022 stands at 1.1% and 0.2% of the total revenue streams from the metallic mining sector and from the entire extractive industry, respectively.

The revenue streams reported by the government for the non-participating non-metallic mining projects for 2022 is at .02% and 0.003% of the total revenue streams from the metallic mining sector and from the entire extractive industry, respectively.

For the oil and gas sector, the combined representation of SC 40 and SC 14C2 is at 0% of revenue streams of the sector and the extractive industry.

As discussed in Section I, Executive Summary, the lone targeted project for the coal sector did not participate, but its refusal to participate did not impact the comprehensiveness of the Report as its total revenue streams is 19.1% of the total extractive industry.

Overall, the projects and companies that did not participate did not impact the comprehensiveness of the Report due to its immateriality. These projects and companies collectively represent 19.3% of the total extractives industry's revenue streams reported by government agencies.

B. SOEs

There are two SOEs in the Philippine extractive sector: Philippine National Oil Company Exploration Corporation (PNOC-EC) for the oil and gas industry and Philippine Mining Development Council (PMDC) for the mining sector. Presented below are the respective payments to the government and dividend declaration, if any, for the year 2022 of PNOC-EC, PMDC and PNOC since PNOC-EC is its subsidiary.

	PMDC	PNOC	PNOC-EC
Actual dividend declaration	-	1,681,504,953	712,713,519
Other payments to government	580,289	1,112,116,914	872,317,533
TOTAL	580,289	2,793,621,867	1,585,031,052

The actual dividend declaration of PNOC and PNOC-EC for 2022 is at 1% and 2%, respectively when compared to the total revenue streams of the extractive industry reported by government agencies. PMDC had no dividend declaration for 2022. The other payments to the government, on the other hand, are at 0.001%, 1.04%, 1.33% for PMDC, PNOC, PNOC-EC, accordingly. With these percentages, the government collections from the SOEs are not deemed significant for further reconciliation. Nonetheless, PNOC-EC is part of the reconciliation of this Report under oil and gas sector.

For 2022, royalty fees amounting to Php33,979,900 were collected by PMDC from the Dinagat Nickel-Chromite project. In addition, commitment fees amounting to Php5,357,143 was generated by virtue of the Project Financing Service Provided (PFSP) agreement with Due East Construction and Equipment, Inc. for the Cagayan de Oro property project.

C. Government agencies

Presented below is the list of government agencies and their respective revenue streams and funds being collected.

Type	Description	Rate	Paid to agency	Unilateral disclosure
Responsible agency: BIR				
Corporate income tax	Calculated based on estimated taxable income	Generally at 30% unless entities are under different tax regimes including ITH (0%) or gross income taxation (5%). Upon expiration of ITH, normal income tax is levied.	Yes	No
Excise tax on minerals	Imposed on coal, metallic and nonmetallic minerals	4% of actual market value of the gross output thereof at the time of removal	Yes	No

Output Value Added Tax (VAT)	Levied on the sale, barter, exchange or lease of goods or properties and services in the Philippines	12% of the gross selling price or gross receipts of the sale, barter, or exchange of goods and services	Yes	No
Selected final withholding tax	Portion of payments made to foreign shareholders, head office, and claim owners	Ranges between 5% and 30% depending on the type of payments made as well as existing tax treaty with another country.	Yes	No
Improperly Accumulated Earnings Tax (IAET)	Applied to closely-held corporations that have retained excess earnings instead of declaring dividends	10% of improperly accumulated taxable income	Yes	No

Responsible agency: BOC

Customs duties	Imposed on all articles imported from any foreign country into the Philippines, except as otherwise specifically provided for in the tariff and customs and other laws	Computed using varying rates depending on the nature and value of the imported article	Yes	No
VAT	Mainly imposed on imported capital equipment	12% of landed cost or the value of imported article plus other charges, as well as excise tax	Yes	No
Excise tax on imported goods	Imposed on selected goods imported such as petroleum products and should be paid before the release from the customs' custody	Tax imposed will depend on the type of product imported.	Yes	No

Responsible agency: PPA

Wharfage fees	Wharfage tariff is imposed for the use of wharf and is assessed against every container and cargo	Tariff varies based on whether the import/ export cargo is domestic or international and is calculated using cargo quantity, weight or measure received and/ or discharged by a vessel Entities with private ports are only liable to pay half or 50% of assessed wharfage fees	Yes	No
---------------	---	--	-----	----

Responsible agency: MGB

Royalty on mineral reservation	Mandated for contractors/ permit holders/ lessees who are parties to a mineral agreement	Mandated for contractors/ permit holders/ lessees who are parties to a mineral agreement Not less than five percent (5%) of the market value of the gross output of the minerals/mineral products extracted or produced from Mineral Reservations, exclusive of all other taxes	Yes	No
Occupation fees	Please refer to the LGU section.		Yes	No
Responsible agency: DOE				
Government share from oil and gas production	Mandated for entities under service contracts	60% of net revenue	Yes	No
Training fund for DOE employees	Assistance for training programs, scholarships, conferences, seminars, and other similar activities for DOE's personnel	DOE employees Assistance for training programs, scholarships, conferences, seminars, and other similar activities for DOE's personnel Equivalent to US\$20,000 during exploration/ development period and US\$50,000 per year during production period	No	No
Responsible agency: LGU				
Local business tax	Allocated between head office and plant/ project office	Not exceeding 2% of gross sales or receipts of the preceding calendar year	Yes	No
Tax on sand, gravel and other quarry resources	Levied on quarry resources extracted from public lands	Not exceeding 10% of fair market value in the locality per cubic meter of the quarry resource	Yes	No
Real property tax - Basic and Special Education Fund (SEF)	Levied on land and machinery Portion of real property is expended exclusively for the activities of the Department of Education	1% to 2% of the assessed value of real property	Yes	No
Occupation fees	LGU's share in occupation fees levied by the MGB	Computed by MGB and are allocated as follows: 30% to the provincial government, 42% to the municipal government, and 28% to the barangay	Yes	No

Other local taxes	Nature and rates of local taxes vary depending on the local government code imposed	Yes	No
-------------------	---	-----	----

Responsible agency: NCIP

Royalty for IPs	Based on DAO No. 96- 40	Not less than one percent (1%) of gross output	No. This is directly paid to IPs.	No
Free and Prior Informed Consent (FPIC) expenditure	One-time payment FPIC proceedings commence	Based on the data gathered during the conduct of the Field Based Investigation (FBI)	No. This is directly paid to IPs.	No

All national government agencies were able to submit their respective reports except for NCIP. Additionally, there are 139 LGUs covered in this report, but only 50 submitted data for reconciliation. These LGUs are as follows:

Region	Province	Participating (Yes/No)	City / Municipality	Participating (Yes/No)

D. Safety and health, environmental and social expenditures (SHES)

Pursuant to the Mining Act, companies incur expenditures for programs and activities related to social development, environmental protection, and rehabilitation. They also establish funds to ensure the availability of financing for their implementation. All such mandatory expenditures and social funds were included in the template irrespective of monetary amounts due to their relevance and importance, as these disclosures not only ascertain regulatory compliance, but also emphasize the social and environmental responsibilities that must be undertaken by the companies.

The required disclosures, however, are limited to those specifically mandated by prevailing regulations and confirmed by the MGB and as such do not include additional activities undertaken as part of their respective Corporate Social Responsibility (CSR) programs. Further, these mandatory expenditures and funds are held in trust funds and are not remitted to MGB.

A summary of mandatory expenditures and funds that are considered unilateral payments, but are nonetheless subjected to reconciliation procedures, as far as practicable, is provided below:

Type	Description	Rate
Responsible agency: MGB		
Annual Environmental Protection and Enhancement Program (AEPEP)	The AEPEP cost covers the amount of environment-related expenses for the entire life of the project wherein the initial 10% of	Under DAO No. 2010-21, AEPEP cost shall approximate 3-5% of direct mining and milling cost

	capital/project cost was derived from the feasibility study forming part of the Declaration of Mining Project Feasibility (DMPF).									
Community Development Program (CDP)	The amount is imposed on exploration activities, which is intended to enhance the development of the host and its neighboring communities.	10% of the approved budget for an entity's two (2) year Exploration Work Program								
Annual Safety and Health Program (ASHP)	The program includes standard operating procedures for mining and milling operations, management and employee training, housekeeping, environmental risk management including emergency response program and occupational health and safety management.	N/A								
Annual Social Development Management Program (ASDMP)	<p>Management Program (ASDMP) SDMP is formulated to fulfill social obligations enhancing the development of communities that are directly and/or indirectly affected by the mining project. SDMP is allocated as follows:</p> <table border="1"> <thead> <tr> <th>Program</th> <th>Allocation</th> </tr> </thead> <tbody> <tr> <td>Social Development and Management (host and neighboring communities) (SDM)</td> <td>75%</td> </tr> <tr> <td>Mining Technology and Geosciences Advancement (MTGA)</td> <td>10%</td> </tr> <tr> <td>Information, Education and Communication (IEC)</td> <td>15%</td> </tr> </tbody> </table>	Program	Allocation	Social Development and Management (host and neighboring communities) (SDM)	75%	Mining Technology and Geosciences Advancement (MTGA)	10%	Information, Education and Communication (IEC)	15%	1.5% of prior year's operating expenses
Program	Allocation									
Social Development and Management (host and neighboring communities) (SDM)	75%									
Mining Technology and Geosciences Advancement (MTGA)	10%									
Information, Education and Communication (IEC)	15%									
Environmental work program (EWP)	EWP details existing environment programs where the exploration work is proposed to be undertaken. Potential effects are identified,	N/A								

	as well as environmental management measures to be implemented, including the total cost of such projects.	
Mine rehabilitation funds (MRF)	<p>The MRF is maintained as a reasonable environmental deposit to ensure availability of funds for satisfactory compliance with the commitments and performance of the activities stipulated in the AEPEP. This is deposited as a trust fund in a government depository bank and shall be used for physical and social rehabilitation of areas and communities affected by mining activities and for research on the social, technical, and preventive aspects of rehabilitation.</p> <p>The MRF is further broken down into two forms, namely the Mine Monitoring Trust Fund and the Rehabilitation Cash Fund.</p>	<p>Mine Monitoring Trust Fund is a deposit of not less than PH₱150,000.</p> <p>Rehabilitation Cash Fund is equivalent to 10% of the total amount needed to implement the EPEP or PH₱5m, whichever is lower</p>
Mine Waste and Tailings Fees Reserve Fund (MWTFRF)	The Mine Waste and Tailings Fees Reserve Fund is to be used for payment of compensation for damages caused by any mining operations and for research projects duly approved by the Contingent Liability and Rehabilitation Fund Steering Committee.	PH₱0.05/MT of mine waste produced and PH₱0.10/MT of mill tailings generated
Final Mine Rehabilitation and Decommissioning Fund (FMRDF)	The fund is established to ensure the full cost of the approved FMR/ DP is accrued before the end of the operating life of the mine.	N/A

E. Material revenue streams

The determination of materiality is primarily guided by monetary values and by whether these revenue streams are considered as main sources of receipts, as confirmed by the collecting government agencies.

The determination of materiality level for the tenth Report was done on a per extractive sector basis, which provided for a uniform monetary threshold and a greater focus on key revenue streams relative to the total revenues per sector. The materiality threshold was calculated using 2% applied to the total revenues collected from the targeted projects per sector as reported by the different government agencies. However, for revenue streams collected by the BIR, limitations exist due to the agency's requirement of waivers prior to providing the data; thus, the revenue stream is limited to those that submitted their waivers. The 2% was benchmarked on the proposed regulatory threshold to be imposed by the Philippine SEC on public companies. Presently, the threshold is at

5%, which if applied will result in fewer revenue streams to be covered. Hence, the adoption of a lower threshold was deemed more prudent and will enable greater and expanded scope.

The MSG also considered including all revenue streams, other taxes, and funds in the reconciliation procedures. In case of variance between the reported amounts of the government agency and participating project, a fixed rate of 5% will be applied against the total reported collection per government agency. If the variance is more than 5% of the total collection of the government agency, a reconciliation of that particular revenue stream will be performed. This option will result in different variance thresholds per participating project and government agency. Although this method may cover a greater scope, it may provide a fragmented analysis of the data and variances, distorting any impact of process recommendations.

In addition to the monetary value of the revenue streams, other taxes, and funds, the nature of the payments based on their relevance and significance to communities and operations was also considered. Thus, withholding tax on foreign shareholders, withholding tax on royalties to claim owners, real property taxes, custom duties, mandatory expenditures, and social funds were included regardless of their amounts.

In-scope and Scope-out revenue streams, other taxes, and funds for this Report is presented in Table 22.

Table II-22. Summary of in-scope and scoped-out revenue streams and other taxes per sector

Revenue Stream and Other Taxes	Govt Agency	Extractive Sector				Metallic Mining

Royalty for IPs	NCIP	-		-		-	-
Total revenue streams and other taxes for FY2020		17,864,926,913		15,978,679,048		15,925,891,579	52,787,469
Percentage covered - targeted revenue streams						99.7%	0%
Percentage covered - total revenue streams						89%	0%

The combined in-scope revenue streams across all sectors is 98% of the total revenue streams for 2020 from the extractive industry while scoped-out revenue streams is only 1%. Table 23 presents the details for each sector - in-scope revenue streams of the metallic, non-metallic and oil and gas sectors are 98%, 90%, and 99.7% of the total revenue streams of their respective sectors and scoped-out revenue streams are 2%, 3%, and 0.2%, correspondingly.

Any variance arising from the reconciliation procedures for the above in scope revenue streams, other taxes, and funds were subjected to additional procedures. Additional procedures included tracing of transactions between detailed schedules provided by participating projects and government agencies and obtaining the supporting documents.

For the coal sector, as discussed in the reporting projects in Page 64, alternative procedures were conducted to present information on revenue streams and other taxes, including obtaining public documents such as audited financial statements and unilateral disclosures by the government agencies.

Application, processing, clearance, and issuance fees for exploration permits, mineral agreements, FTAA, and quarry resources, sand and gravel permit/license expected to be incurred before operations, and other fees paid for subsequent services rendered by MGB (i.e., verification, umpiring, surveys, and other services) are likewise considered immaterial and scoped out in the reconciliation.

In addition, the following revenue streams were also excluded as these were determined to be not applicable to the local mining and oil and gas industry sectors because these are zero-rated or not yet due given the stage of the operation. These may also represent payments made on behalf of other taxpayers (e.g., employees), although still attributed to their operations. These are as follows:

- Fringe benefit and withholding tax on salaries and benefits that are mainly compensation related with remittances made only by entities on behalf of employees.
- Expanded withholding tax is tax imposed on income payments and is creditable against the income tax due of the payee for the taxable period in which the income was earned. It is only a means of approximating and collecting in advance the income tax liability of a payee since income taxes are due and paid on a quarterly and annual basis.
- Government share from FTAA and JV agreements with no company operating under said contractual provisions in 2012. The first FTAA mining project only commenced commercial operations in April 2013.
- Output VAT for metallic mining, oil and gas, and coal is not in scope since revenue transactions of the companies in these industries are zero-rated (e.g., export-oriented) or exempt as provided by law (e.g., PD 87).
- Documentary stamp taxes, import processing fees, storage fees, and arrastre and stevedoring charges were also excluded because of their minimal value.

IV. Reconciliation Results

In this section, payments and collections from participating projects and government agencies, respectively, are presented. The tables will include information on the following:

- **Project amount** - refers to the amount reported in the template by the participating project
- **Government agency amount** - refers to the amount reported in the template by the government agency
- **Variance pre-reconciliation** - pertains to the initial difference between the amount reported by the project and the government agency
- **Reconciled amount** - reflects the true amount of the transaction between the project and the government agency. It is duly supported with detailed schedules and supplemental documents.
- **Variance post-reconciliation** - amount that cannot be supported with either a detailed schedule or other documents.

A. Revenue streams

The following tables show the detailed collections per government agency, per revenue stream and other taxes, per industry sector, and per project:

i. Reconciliation results disaggregated by government agency

The graph below summarizes the results of reconciliation, excluding non-participating projects, in percentages.

Figure II-10. Summary reconciliation results in percentage contributions

The most glaring number from the graph would be the PhP8.7bn variance or 101% of the total variance for BIR which is due to the lack of supporting document provided by Prime Energy Resources Development B.V. for SC 38. The remaining variance of PhP8.9bn is attributed to Prime Energy alone.

Consistent with the FY2021 report, it is BIR who has the biggest contributions to the amount reported by the projects at 69% or PhP41bn, government collections at 49% or PhP32bn, and reconciled amount at 49% or PhP31bn. DOE follows at second place at 19% or PhP11bn, 41% or PhP27m and 43% or PhP27bn of the total amount reported by the projects, government collections and reconciled amount, respectively. Nonetheless, DOE is still the only NGA that attained a zero variance after reconciliation which is consistent previous reports.

For more details on the causes of unreconciled variances, refer to page 138, Section VI, Variances and discrepancies.

Unilateral disclosures for non-participating projects

The details of the non-participation of the projects were discussed in Section III, Scope of the report. Table 32 sets out the unilateral disclosures of government agencies for the non-participating projects. Note that only non-participating projects and revenue streams with corresponding government amounts are presented.

Table II-32. Unilateral disclosures for non-participating projects

Sub-total - Coal				15,978,679,048	89%
Total				16,187,251,618	19.3%

As indicated in Table 32, the non-participation of projects in the metallic mining, non-metallic mining, oil and gas, and coal sectors represents 1%, .02%, 0% and 89%, respectively, of their corresponding sectors. In terms of the entire extractive industry, the non-participation of projects in the metallic mining, non-metallic mining, oil and gas, and coal sectors represents 0.3%, 0.003%, 0% and 19.09%, respectively. The combined revenue streams of non-participating is at 19.3% of the total revenue streams of the extractive industry which is considered immaterial and does not impact the comprehensiveness of the Report.

V. LGUs in focus

The LGUs' sources of revenues may be classified into indirect payments, such as shares in national wealth and from internal revenue allocation (IRA), and direct payments such as those collected by LGUs themselves based on national laws and local tax codes. Examples include local taxes on business and real property, community tax, and other taxes and fees.

The details of direct LGU payments reconciliation and corresponding analysis are presented in this section. DBM releases of LGU's share in national wealth and MGB allocation of collected royalties on mineral reservation are also covered in this section.

Amounts reconciled are only those for provinces, municipalities, and cities. Reconciliations of LGU figures do not include share in national wealth of barangays as the report focuses on share in national wealth processed for release to provinces, municipalities, and cities.

A. Direct payments to LGUs

In 2022, PhP1.9bn (2019 - PhP1.5bn) were directly remitted to LGUs as hosts of the extractive projects. This is in addition to the LGU's share in national wealth as distributed by the DBM which will be discussed in the 'shares in national wealth' sub-section.

Figure II-11. Distribution of reconciled collections per region

Of the total LGU receipts, Region XIII, which hosts the most number of metallic projects, continued to receive the highest collection of local taxes at PhP529m or almost 27% of total payments in 2022 (2019 - PhP702m or 39%). The significant contributors of local taxes in Region XIII (Caraga) are Platinum (PhP102m), Taganito Mining (PhP97m), Carrascal Nickel (PhP80m), Marcventures (PhP65m), and Philsaga (PhP64.5m).

Following Region XIII is Region III with total reconciled direct payments amounting to PhP364m or almost 19%. Region III host most number non-metallic projects. Eagle Cement contributed to 63% of the total reconciled direct payments.

The succeeding tables summarized the reconciliation of direct LGU payments mapped to respective regions, provinces, and municipalities/cities, accordingly, including disclosures for non-participating projects.

Table //33. Summary of reconciliation for direct LGU collections disaggregated by municipality/city

B. Share in national wealth

LGUs are entitled to a 40% share in national wealth. These shares are released to the LGUs by the DBM. The succeeding tables show a summary of LGU shares as reported by the DBM and the LGUs hosting extractive operations. Similar to the prior reports, reconciliation of the shares in national wealth proves to be challenging given the current level data of disaggregation and the availability of information to the LGUs regarding their shares in national wealth.

Discrepancies between the amount transferred and the amount calculated in accordance with the relevant revenue sharing formula can be attributed to the cap in the amount that can be allocated to a specific LGU.

The amount allocated by the DBM is limited to the amount of share in national wealth programmed into the LGUs' current year budget. Should the amount of share in national wealth allocated to an LGU exceed the programmed amount in the LGU's current year budget, the excess would be distributed to the LGU in the subsequent year. On the other hand, there is also no minimum amount that should be allocated to an LGU, as this is entirely based on the amount allocated by the BIR and/or MGB.

By regulation, share of mining taxes is released automatically, with no further action needed, to the concerned provincial, city, municipal or barangay treasurer. However, there are instances wherein the shares of certain LGUs are not released. This happens when there are uncertain details on the LGU to whom the share is allocated. For example, if the name of the barangay to be given the allocation is not specified by the BIR/MGB, this will be investigated by the DBM and will not be released until the uncertain detail has been disposed of.

Tables 34 to Table 37 details the reconciliation of shares released by DBM and shares received by LGU for mining taxes, royalty on mineral reservations, energy sources and forestry charges.

i. Mining taxes

Table II-34. Reconciliation of shares in national wealth from mining taxes

VI. Variances and discrepancies

This section provides analysis of the variances noted during the reconciliation process including and excluding non-participating projects.

Table 38 summarizes the variance on per industry and per government basis.

Table II-38. Variance per industry sector and per government agency

	Government agency amount (excl. non-participating projects)	Variance post-reconciliation (excl. non-participating projects)	% Variance (excl. non-participating projects)	Government agency amount (incl. non-participating projects)	Variance post-reconciliation (incl. non-participating projects)	% Variance (incl. non-participating projects)

Total (excluding NCIP)	66,165,632,535	(8,757,443,708)	-13.2%	66,478,846,083	(8,635,578,031)	-13.0%
Total (excluding NCIP and LGU)	64,737,623,379	(8,689,338,249)	-13.4%	64,979,249,956	(8,636,176,556)	-13.3%

The remaining unexplained variance, excluding NCIP, in FY2022 is -13% which is higher compare to FY2021 which stands at -1.31%. Biggest contributor to this increase is the final withholding tax payment to BIR that Prime Energy (SC38) disclosed, but was not able to provide any supporting documents. If this was excluded, the rate of unexplained variance in FY2022 would be only be 0.3%.

The following subsections will present and discuss discrepancies for each government agency.

A. BIR

i. Revenue streams

	Corporate income tax	Excise tax on minerals	Output VAT	Final withholding tax			
				Foreign shareholders dividends	Branch profit remittance	Royalties to claim owners	Others
Frequency of payment	Quarterly, adjusted in annual filing	Quarterly, when applicable	Monthly and quarterly, when applicable	Monthly and quarterly, when applicable			
Form/document	1702	2200M	2550M, 2550Q	0619F, 1601FQ			
Timing of payment	Quarterly - within 60 days following the close of each of the first 3 quarters of the taxable year Annual - on or before the 15th day of the 4th month following close of the taxpayer's taxable year	On or before 15 days after the end of the calendar quarter when mineral products were removed	Monthly - on or before the 20 th day following the close of each of the month for the Quarterly - on or before the 25 th day following the close of each of the quarter	On or before the 10th day of the month following the month in which withholding was made			
Mode of payment	Tax returns are filed through Electronic Filing and Payment System (EFPS) and Electronic Bureau of Internal Revenue Forms (eBIR) for large and non-large tax payers, respectively. Payments are made through Accredited Agent Banks (AABs) online or over the counter. For participating entities in places where there are no AABs, payments are made to the Revenue Collection Officer or duly Authorized City or Municipal Treasurer located within the Revenue District Office (RDO) where entities are registered.						
Remittance from agency	Over the counter and EFPS collections by AABs (except Land Bank of the Philippines (LBP) and Development Bank of the Philippines (DBP) are remitted to the Central Bank of the Philippines (BSP) on the 6th and 5th day, respectively, from the date of collection. Collections by LBP and DBP are directly credited to the Bureau of Treasury (BTr).						

ii. Findings and causes of variance

Table II-39. Summary of discrepancies for BIR revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Metallic mining						
Corporate income tax	8,573,805,159	8,478,106,618	(95,698,541)	8,493,638,902	72,973,054	0.86%

Excise tax	6,518,120,981	6,588,354,316	70,233,334	6,263,808,544	94,034,974	1.43%
Withholding tax - Final	670,200,356	1,153,191,380	482,991,024	678,463,895	2,299,039	0.20%
Withholding tax - Foreign shareholder dividends	258,789,510	143,000,000	(115,789,510)	260,064,510	-	0.00%
Withholding tax - Profit remittance to principal	-	-	-	-	-	0.00%
Withholding tax - Royalties to claim owners	265,449,408	54,017,353	(211,432,054)	249,487,262	(16,047,617)	-29.71%
Total - Metallic mining	16,286,365,415	16,416,669,667	130,304,252	15,945,463,113	153,259,450	0.93%
Non-metallic mining

Total	41,068,178,747	32,669,352,388	(8,398,826,359)	30,615,235,242	(8,679,878,065)	-26.57%

a. Timing difference

Pre-reconciliation variance is mainly due to participating projects and BIR reporting payments based on when the payment is made and not on when the payment is due. These were disposed of during the validation of supporting documents provided by the participating projects.

b. Different accounting period

Few of the participating projects have an accounting period that is not calendar or not ending on December 31; thus, they disclose data following their fiscal period while BIR followed the calendar period. These were disposed by obtaining prior submissions of BIR.

c. Improper accomplishment of reporting template

Some participating projects disclosed taxes paid instead of taxes due. For an instance, income taxes were disclosed at net of quarterly payments made and CWTs. Additionally, some also made errors in the encoding of data. Further, BIR includes penalties in their submission while the projects only disclose the actual tax due which is the proper amount to be reported and reconciled.

The resulting variance pre-reconciliation is disposed during the validation of schedules and supporting documents provided by the participating projects.

- d. Delayed and non-submission of required schedules and documents to support disclosures made in the templates.

Due to the number of information requested and required level of disaggregation, current accounting and filing systems may have hindered some projects and BIR from readily providing these disclosures and reports for reconciliation and examination. This is specifically true with the validation of variances pertaining to excise tax on mineral production and final withholding taxes given the number of transactions involved as evident in Table 48.

B. BOC

i. Revenue streams

	Custom duties	Value added tax (VAT) on imported materials and equipment
Frequency of payment	Transactional	Transactional
Form/document	Form 236, Import Entry and Internal Revenue Declaration Form	
Timing of payment	Entry must be filed in the Customhouse (i.e. BOC office) within 30 days from the date of discharge of the last package from the vessel, which shall not be extendible. Payments are made after completion of the assessment process by the government agency.	
Mode of payment	AABs will be notified by the government agency to debit entities' bank account.	
Remittance from agency	Collections through the AABs are remitted to the BTr on a daily basis.	

ii. Findings and causes of variance

Table II-40. Summary of discrepancies for BOC revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Metallic mining						
Customs duties	223,724,084	123,872,122	(99,851,962)	117,092,046	(7,637,719)	-6.17%
VAT on imported materials and equipment	886,588,241	830,712,280	(55,875,961)	694,014,596	49,129,596	5.91%
Total - Metallic mining	1,110,312,324	954,584,401	(155,727,923)	811,106,642	41,491,877	4.35%
Non-metallic mining						
Customs duties	68,635,446	67,236,090	(1,399,356)	59,441,074	(2,544,210)	-3.78%
VAT on imported materials and equipment	1,682,558,866	1,809,859,591	127,300,725	1,260,817,289	(34,017,240)	-1.88%
Total - Non-metallic mining	1,751,194,312	1,877,095,681	125,901,369	1,320,258,363	(36,561,450)	-1.95%
Total	2,861,506,636	2,831,680,082	(29,826,554)	2,131,365,005	4,930,427	0.17%

a. Timing difference

Pre-reconciliation variance is mainly due to participating projects recording payments to BOC based on when the payment is made while BOC records these transactions upon

arrival of imported items. These were disposed of during the validation of supporting documents provided by the participating projects.

b. Different accounting period

Few of the participating projects have accounting period that are not calendar or not ending in December 31; thus, they disclose data following their fiscal period while BOC followed the calendar period. These were disposed of by obtaining prior submissions of BOC.

c. Misclassification of payments

Some participating projects misclassified the revenue streams on both ORE and corresponding supporting schedules. Common error was reporting excise tax on imported materials and equipment and other charges as part of custom duties or VAT on imported materials and equipment. These were disposed of during the validation of supporting documents.

d. Absence of supporting documents for transactions disclosed by BOC

Supporting documents for all noted variance from the participating projects were initially obtained, however, there are few transactions that the supporting documents can't be located which pertain to transactions reported by BOC. The supporting documents that BOC provided are inadequate since these were only screenshots from the system the data provided for the exercise were obtained. These transactions remain unreconciled.

C. DOE

i. Revenue streams

	Government share from oil and gas production
Frequency of payment	Quarterly
Form/document	Quarterly reports
Timing of payment	Payment is made through checks along with submission of quarterly report
Mode of payment	Paid in cash or checks
Remittance from agency	Checks collected will be remitted to BTr by the treasury division within the day of collection or the following day

ii. Findings and causes of variance

Table II-41. Summary of discrepancies for DOE revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Oil and gas						
Government share from oil and gas production	11,487,158,138	27,062,298,248	15,575,140,111	27,096,587,500	-	0%

a. Improper accomplishment of reporting template

The amount disclosed by Shell Philippines Exploration B.V. for SC38 as the Philippine Peso equivalent for the government share from oil and gas is the amount for the allocation to BIR for income taxes and others. This were disposed of during the validation of supporting schedules.

b. Foreign exchange rate used in reporting the government share in Philippines peso

Minimal variance was noted as a result of the different foreign exchange rates used in converting the government share, originally reported in US dollar, to Philippine Peso. These were disposed of during the validation of supporting schedules.

D. LGU

i. Revenue streams

Revenue streams of LGUs are discussed in page 79, Section III, Scope of the report, of this chapter.

ii. Findings and causes of variance

Table II-42. Summary of discrepancies for LGU revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Metallic mining						
Nickel						
Local business tax	668,903,925	647,997,803	(20,906,122)	652,092,670	41,430,638	6%

Subtotal - Non-metallic mining	647,061,909	209,710,642	(436,788,660)	584,075,309	(70,095,444)	-33%
Oil and gas						
Local business tax	607,333	-	(607,333)	37,356	-	0%
Real property tax - Basic	312,527	-	(312,527)	204,056	-	0%
Real property tax - SEF	1,627	-	(1,627)	110,098	-	0%
Subtotal - Oil and gas	921,488	-	(921,488)	351,511	-	0%
Total	2,106,379,238	1,428,009,157	(677,807,474)	1,940,710,992	(68,105,459)	-5%

a. Incomplete data submitted by BLGF

The different LGUs use ENRD MT to report their collections and BLGF generates the data using the same system. Although a reporting system is in place, the reported transactions remain to be incomplete mainly due to non-submission and/or incorrect submission of the different LGUs into the system. For an instance, only one (1) or two (2) quarterly payments were disclosed in the report submitted by BLGF for participating projects who availed of the quarterly payments for local business tax and real property tax. There were also cases wherein the participating project was able to provide multiple official receipts (OR) for real property tax while only 1 was listed in the data submitted by BLGF and the OR number indicated is the same as the OR number for the local business tax which does not and should not happen.

b. Timing difference

Another factor for pre-reconciliation variance are the advance payments made by projects usually for real property taxes. These advance payments occur in the year before and it would no longer be included in current year submission of BLGF, but the projects include these in their disclosure which is appropriate since these payments are for the current year. These were disposed of during the validation of supporting documents provided by the participating projects and obtaining prior submissions of BLGF.

c. Different accounting period

Few of the participating projects have an accounting period that is not calendar or not ending on December 31; thus, they disclose data following their fiscal period while LGUs followed the calendar period. These were disposed by obtaining prior submissions of BLGF.

d. Misclassification of payments

Some participating projects included other administrative and regulatory fees as part of local business tax. These were disposed of during the validation of supporting documents.

e. Absence of supporting documents

Similar to the case of excise tax and final withholding tax, the volume of transactions for real property tax incurred in the mine site have hindered the participating projects to produce the documents. The remaining variances were due to the absence of supporting document

E. MGB

i. Revenue streams

10% share of royalty payment

Mining companies pay various taxes and fees directly to the LGUs including royalty payments. Section 82 of the Philippine Mining Act of 1995 (RA 7942) and Section 290 of the Local Government Code (LGC) indicate that the LGU's share in royalty payments on mineral reservation is 40% of the 90% of balance after 10% of the payment goes to a special account in the General Fund (Fund 151) which is appropriated annually for the operating expenses of the DENR-MGB.

Section 5 of RA 7942 likewise stipulates that 10% of the amount collected will accrue to the MGB for "special projects and other administrative expenses related to the exploration and development of other mineral reservations". The other 90% will be divided between the national government (60%) and the local government units (40%) where the minerals are located.

ii. Findings and causes of variance

Table II-43. Summary of discrepancies for MGB revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Metallic mining						
Nickel						
Royalty on mineral reservation	2,214,154,956	2,174,292,660	(39,862,296)	1,191,748,299	(14,390,611)	-1%

a. Timing difference

On the initial variance noted, the most common cause pertains to the timing of recognizing the royalty on mineral reservation. MGB and some projects included royalty for prior years not covered by the scope of the report, but were only paid in 2020.

b. Different accounting period

Few of the participating projects have accounting period that are not calendar or not ending in December 31; thus, they disclose data following their fiscal period while MGB followed the calendar period. These were disposed by obtaining prior submissions of MGB.

c. Non-submission of required supporting schedules

The remaining variance pertains to MPSA No. 078-97-XIII (SMR) of Cagdianao Mining Corporation which failed to provide supporting schedules.

F. NCIP

i. Other taxes

Other taxes monitored by NCIP are discussed in page 67, Section III, Scope of the report, of this chapter.

ii. Findings and causes of variance

Table II-44. Summary of discrepancies for NCIP revenue streams

	Project amount	Government agency amount	Variance pre-reconciliation	Reconciled amount	Variance post-reconciliation	% Variance
Metallic mining						
Nickel						
Royalty for IPs	424,140,430	5,300,265	(418,840,165)	195,978,011	(81,574,840)	-19%
Gold / Silver / Copper						
Royalty for IPs	222,329,830	95,880,801	(126,449,029)	208,216,663	(28,165,034)	-13%
Total - Metallic mining	646,470,259	101,181,066	(545,289,194)	404,194,673	(109,739,874)	-17%
Limestone						
Royalty for IPs	2,155,734	-	(2,155,734)	2,155,734	-	0%
Total - Metallic mining	648,625,993	101,181,066	(547,444,927)	406,350,407	(109,739,874)	-17%

- a. Minimal participation of NCIP
Only a few NCIP regional offices submitted data due to the unavailability of information at the central office. Because of this, the supporting documents from the participating projects were obtained to arrive at the reconciled amount.
- b. Non-submission of supporting documents
Some of the amounts could not be validated due to lack of supporting documents to reconcile amounts disclosed by participating projects.

VII. Audit procedures

A. Participating projects

Reporting templates submitted by the participating projects require senior management signoff. These templates are prepared and endorsed by finance officers responsible for the day to day recording of transactions, preparation of financial reports, and compilation of data. Companies of participating projects use Philippine Financial Reporting Standards (PFRS) or PFRS for Small and Medium-sized Entities as the accounting framework in recording transactions, which is the major source of information for the reporting templates. These standards are adopted from the International Financial Reporting Standards issued by the International Accounting Standards Board.

As required by the SEC, companies prepare annual financial statements that are required to be audited by an external auditor and submitted on or before the 15th of the fourth month following annual period end. External audit involves obtaining sufficient and appropriate audit evidence about the amounts and disclosures in the financial statements and are conducted in accordance with Philippine Standards on Auditing, adopted from International Standards on Auditing.

By signing off the reporting templates, participating projects represent that the data provided in the templates are actual and valid transactions obtained from the projects' records and reconcile with that presented in the audited financial statements.

B. Government agencies

Government agencies prepare periodic reports in accordance with Philippine Public Sector Accounting Standards. Audit is performed by COA in accordance with the Government Auditing and Accounting Manual (GAAM) and is conducted in two (2) phases:

1. Annual financial audit performed in accordance with PD 1445 obtaining evidence on each government agency's revenues and expenditures.
2. Monthly review of collections and disbursements performed by resident auditors of each government agency.

COA's audit procedures over revenues are focused on agreeing collections with remittances to the national treasury.

Reporting templates submitted by each government agency are signed off by the head of the agency (assistant secretary or higher position) to signify that amounts reported are the actual collections as recorded in their accounting system.

Accordingly, reporting templates of all participating projects and government agencies were ascertained to comply with the above procedures; hence deemed reliable and comprehensive with no exceptions identified other than those gaps included as part of recommendations under Section VIII, Recommendations. Recommendations noted in the Report were limited to areas covering administrative functions of each of the government agency that would not impact the reported revenues.

It is noteworthy to emphasize that companies of participating projects and government agencies provided quality assurances by certifying the following, as duly stated in the last section of the reporting templates:

1. The signatory is the duly authorized and designated representative of either the project or government agency; and
2. All information disclosed and documents submitted in satisfaction of the EITI initiative are considered authentic and complete, and all statements and information provided therein are true and correct.

There were no identified exceptions or instances of non-compliance on the above.

VIII. Recommendations

Improving EITI implementation

A. MSG and PH-EITI Secretariat

The succeeding discussions are fundamentally similar to points raised in the sixth PH-EITI Country Report with additional recommendations on the data collection process and ORE reporting.

Timeliness and timing. The PH-EITI exercise should start by May or June following the covered year; thus, the start of the production of the PH-EITI report covering fiscal year 2024 should begin in May or June 2025. Data collection should end by July, and reconciliation begins in August lasting until November. By December of the same year, the report is finalized and published. In this timeline, companies would also have their full attention on the exercise since it does not coincide with the tax season (January-April).

Data collection. On the onset, a discussion should be conducted with all parties, companies, and government agencies to debrief the events that transpired during the previous report, to discuss the common sources of variances, to obtain updates from recommendations from the previous report, and to discuss the process for the current exercise and changes, if any. It is also important to highlight and reiterate to participating projects and government agency that the EITI implementation follows the accrual basis of reporting, which means that government payments due in 2022 although paid in 2021 or 2023 should be included in the reported amounts and payments made in 2022, but due for other year should be excluded. In addition, ensure participating projects to submit detailed supporting schedules for all payments to different government agencies for efficient reconciliation. Further, requests of audited financial statements to the SEC should be made once the targeted projects have already been finalized.

Strict implementation of DAO No. 2017-07. The issuance of the administrative order mandating mining contractors to participate in the PH-EITI project clearly shows the commitment of DENR-MGB to ensure more transparency and accountability from the sector. Show cause orders should be sent immediately to mining projects who did not participate and not after the report has been published. If reasons for non-participation is unjustified, there should be consequences.

Participation of oil and gas and coal sectors. While the oil and gas sector has been consistently well represented in the previous PH-EITI reports, we still recommend that the DOE issue an

administrative order similar to DAO No. 2017-07 to further promote accountability and transparency in the sector.

Criteria for participation. Submission of schedule of payments should be considered as mandatory submission for participation since it is an integral part of the reconciliation process. Any delay in submission of the schedule of payments can lead to lower reconciled amount and higher post-reconciliation variance.

Improvement of ORE. Technical issues were experienced during the data collection for this cycle. The supporting schedules and supporting documents uploaded by the projects were not retrieved which led to requesting these via email which contributed to the delay in the reconciliation.

Data centralization. Constraints due to infrastructure limitations (e.g. none or slow internet bandwidth) have been the primary source of issue on accessibility of data. While satellite and regional offices periodically report to head offices (i.e., NCR/ Metro Manila), delays in the data were the primary cause of variances and delays in the reconciliation procedures. MGB implemented measures (i.e. workshops, direct involvement in the gathering of data from the regional offices) that contributed to the improvement in the reconciled MGB revenue streams. However, MGB continues to struggle when it comes to monitoring for safety and health, social and environmental expenditures. MGB should enforce the regional office to report these expenditures together with their collections. Meanwhile, NCIP continues to have difficulty with gathering data from regional offices wherein most locations do not have readily available information on the royalty for IPs. In lieu of a centralized reporting system, the national office of NCIP should establish formal policies that will require regular reporting of regional offices. The national office of NCIP should institute policies and programs to monitor royalty for IPs paid by mining companies. These policies and procedures should also encompass tracking of the projects and programs paid for by these royalties.

B. Government agencies

Observation/s	Recommendation/s
Bureau of Internal Revenue (BIR)	
<p>Consistent source of variance for the BIR is timing difference where projects disclose tax due for the covered period regardless of when it was paid (accrual basis) while BIR discloses taxes paid in the covered period (cash basis)</p> <p>Refer to page 134, Section VI, Variances and discrepancies for details.</p>	<p>Reiterate to the BIR that the basis of reporting is accrual which should encompass taxes due for the covered period regardless of when it was paid.</p>
Bureau of Local Government Finance (BLGF)	
<p>In the reconciliation process, it was still observed that the data submitted by BLGF was incomplete. This is mainly due to the several system breakdowns of ENRDMT, the main system used by the different LGUs for reporting.</p> <p>Refer to page 134, Section VI, Variances and discrepancies, for details.</p>	<p>DOF, through MSG, could help BLGF in the assessment and improvement of ENDRMT since MSG is set to continuously improve ORE. Aside from the improvement of ENDRMT, focus should also be placed on training the personnel of the different LGUs on how to properly use the ENRDMT and how their work impact the PH-EITI exercise.</p>
National Commission on Indigenous Peoples (NCIP)	
<p>For the past 10 reports, NCIP has been consistently struggling in providing disclosures to PH-EITI.</p>	<p>An urgency should be placed on the implementation of NCIP monitoring tool for IP royalties.</p>
