

Introducing EITI Data: Enhancing Transparency in the Extractive Industries

2024 Regional Roadshows (Mindanao Cluster)
26 September 2024 (Thursday),

The **Extractive Industries Transparency Initiative (EITI)** is a global standard of transparency that requires oil, gas, and mining companies to disclose what they pay to the government, and the government to publish what they collect from these companies, for the open and accountable governance in the extractives.

*“We believe that a country’s **natural resources belong to its citizens.** Our mission is to promote understanding of natural resource management, strengthen public and corporate governance and accountability, and **provide the data to inform policymaking and multi-stakeholder dialogue in the extractive sector.**”*

Importance of Transparency in the Extractive Sector

By making information about contracts, revenues, and payments public, it becomes harder for officials or companies to engage in corrupt practices.

Transparency allows citizens and oversight bodies to track how much money is generated from natural resources and how it's being used by the government.

Open access to information helps citizens understand how their country's resources are being managed, fostering trust in government and industry.

Established by virtue of **EO No. 79, s. 2012** and **EO No. 147, s. 2013**

Admitted as an EITI candidate country on **22 May 2013**

Included under the **Philippine Open Government Partnership (PH-OGP) National Action Plan** since 2013

Operationalized by a Multi-stakeholder Group (MSG) from government, industry, and civil society with assistance from a National Secretariat

PH-EITI primarily works to achieve five specific objectives

Show **direct and indirect contribution** of extractives to the economy (through the EITI process)

Improve **public understanding** of the management of natural resources and **availability of data**

Strengthen **national resource management** and **government systems**

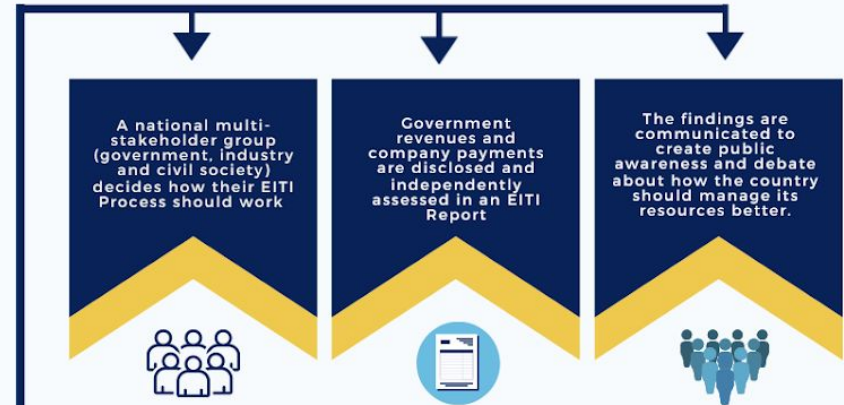

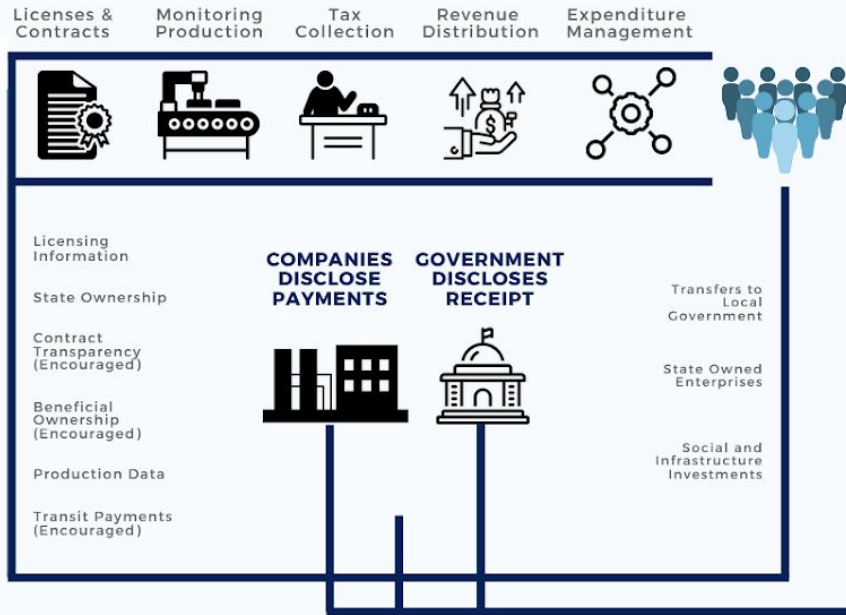

Create opportunities for **dialogue and constructive engagement** in natural resource management in order to **build trust and reduce conflict** among stakeholders

Pursue and strengthen the extractive sector's contribution to **sustainable development**

EITI Reporting Process

Data disclosed by the PH-EITI through the EITI process

Contracts & licenses

- Contracts
- Beneficial Ownership

Production

- Exploration Activities
- Production figures
- Export data

Revenue collection

- Tax revenues
- Sales by governments and state-owned enterprises

Revenue allocation

- Revenue management
- Distribution of revenues
- Subnational Transfers

Social & economic spending

- CSR payments
- Contribution to national economy
