

# Mainstreaming Disclosures

Pamela A. Grafilo

# Mainstreaming: OUR GOAL

Data required to comply with the EITI Standard are normally collected and made public through Annual Reports

Mainstreamed EITI Data

- Information required by EITI standards available through government and corporate reporting systems (databases, websites, annual reports, portals etc)
- EITI data is timely reliable and accessible

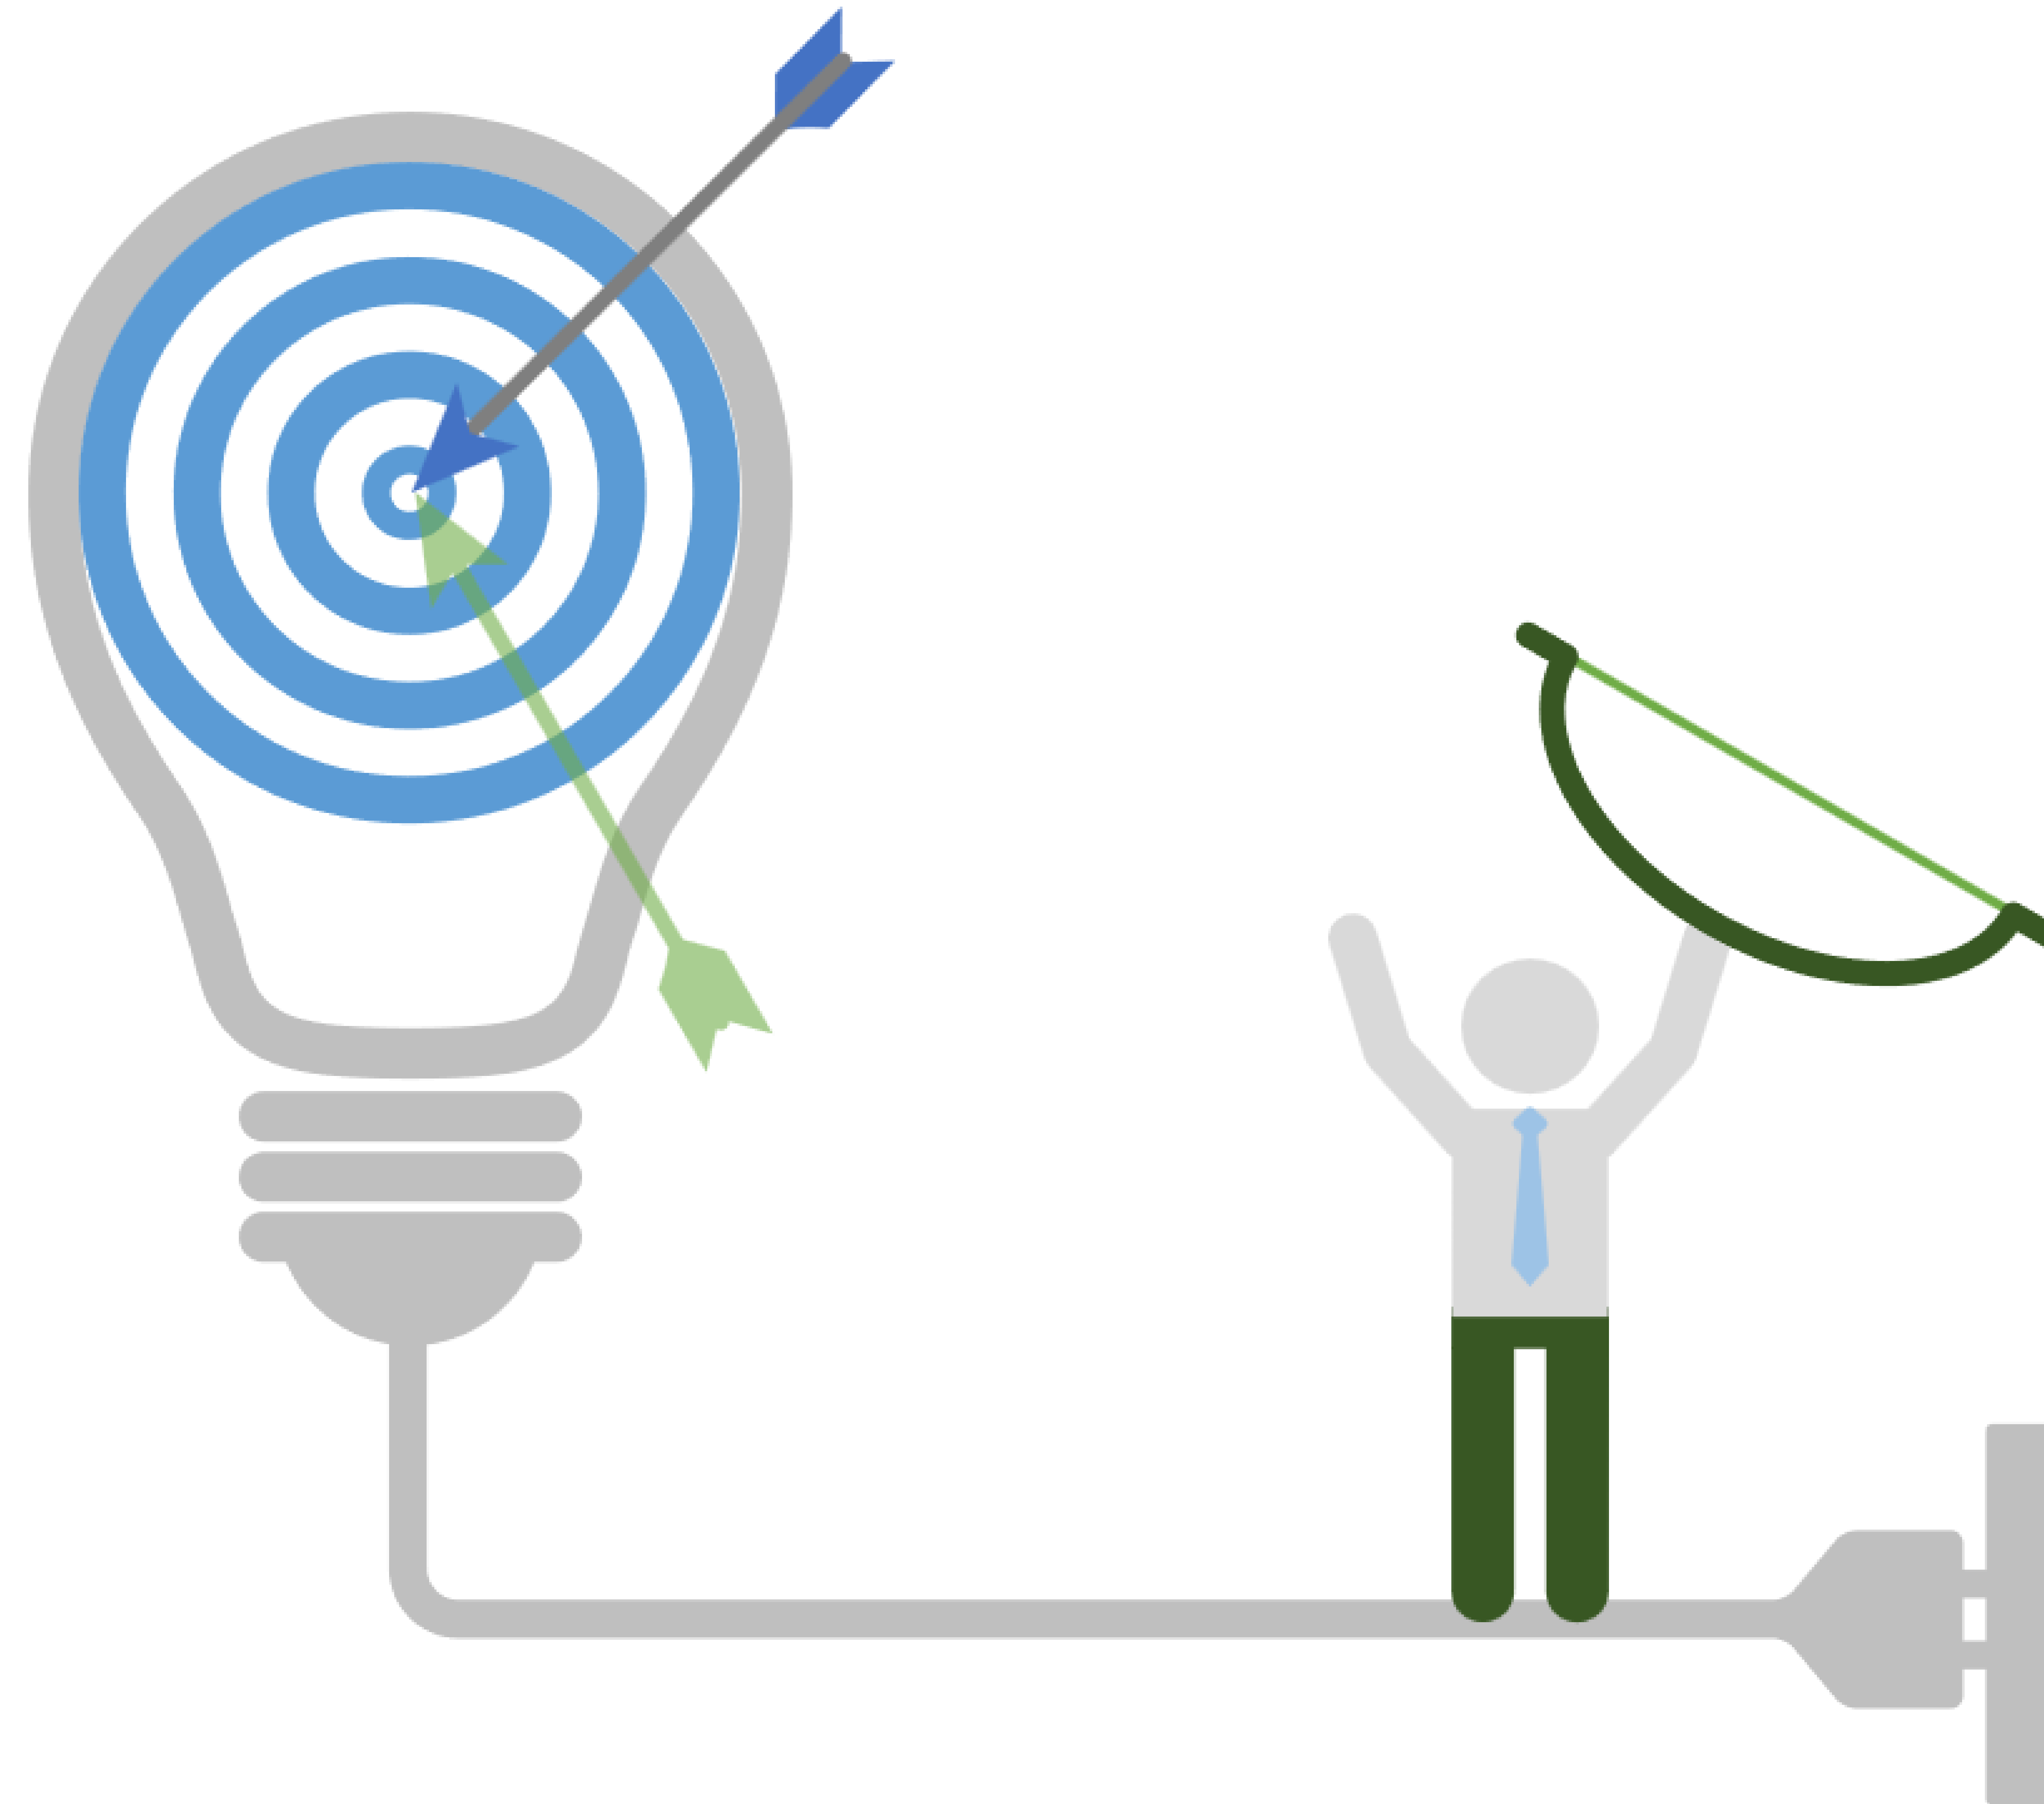

# Our Mission:

**DRIVE**

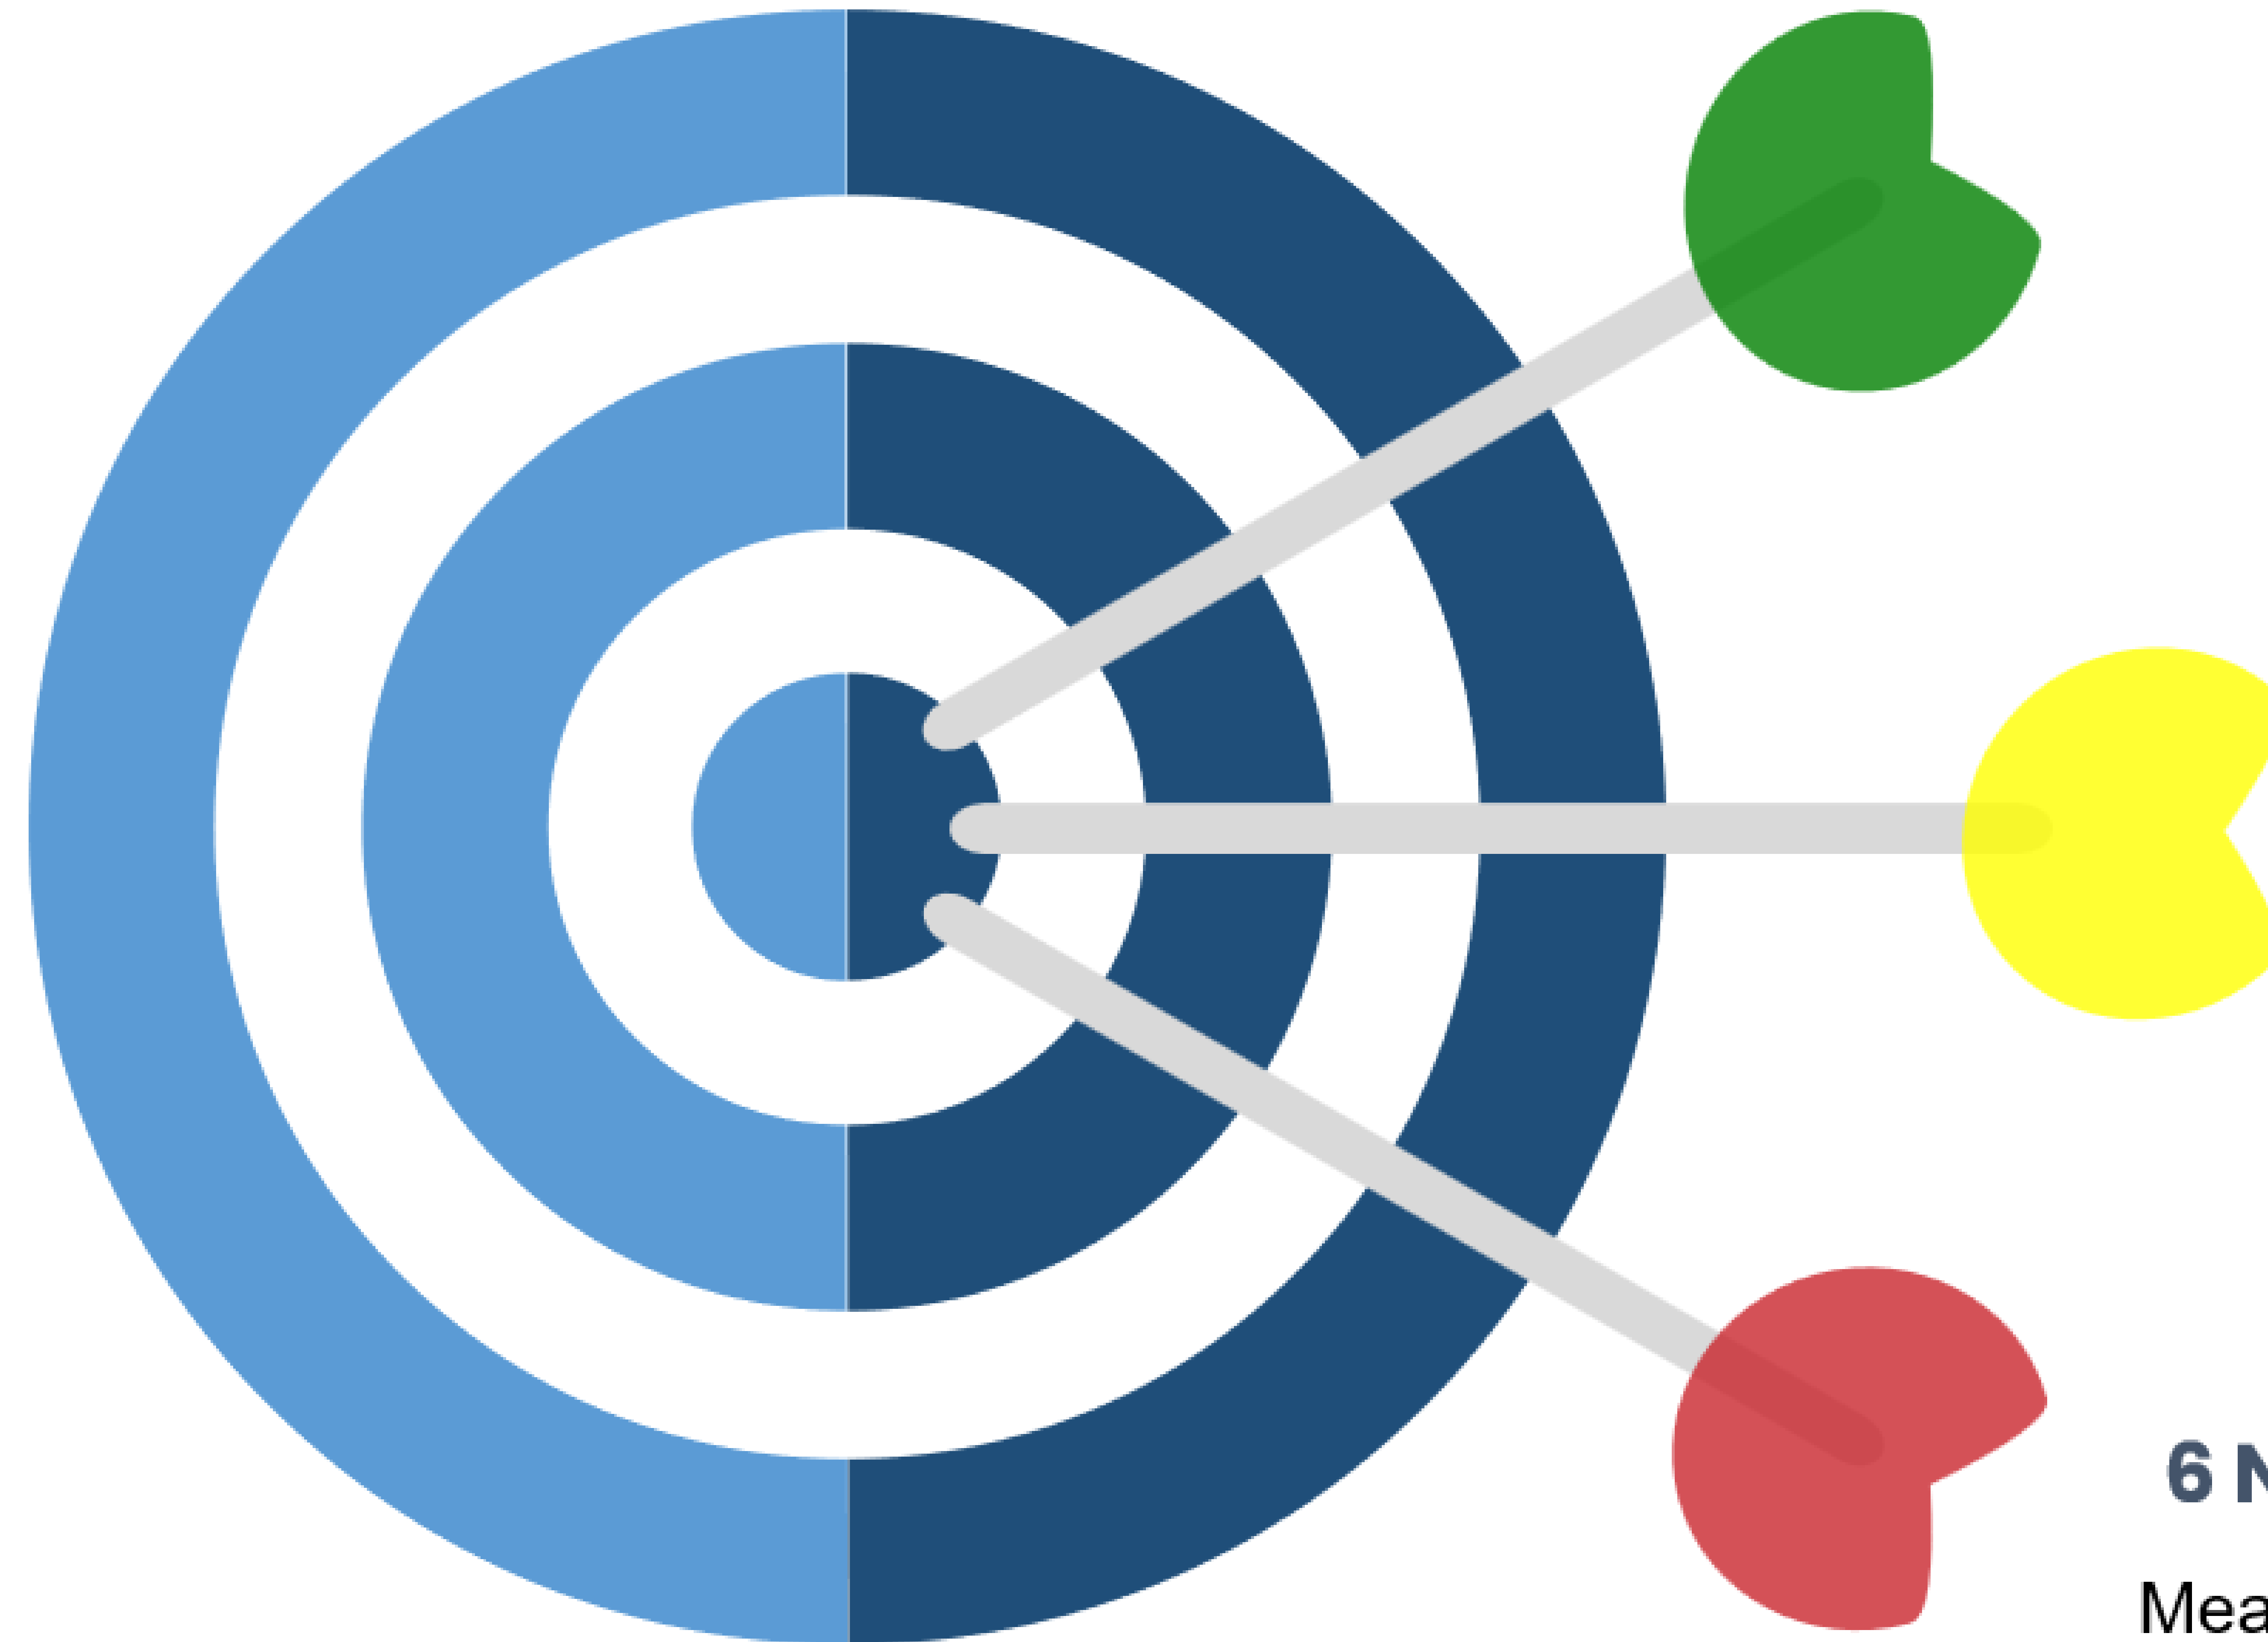

**CATALYZE**

**INFLUENCE**

→ **PACE**, **SCOPE** and **QUALITY** of systematic disclosure of EITI data

# OUR TARGET: 16 Standards

## **1 Mainstreamed**

EITI data is (i) comprehensive and available in government websites in open and disaggregated data formats, (ii) reliable and validated, and (iii) current and regularly updated.

## **9 Partially Mainstreamed**

EITI data are (i) available in the agency but are not disclosed and made public in any website; (ii) need to be requested from the agency to be able to gain access; (iii) reliable and validated; and, (iv) updated regularly.

## **6 Needs Improvement**

Means that (i) data are not comprehensive, disaggregated and in open data format; (ii) not disclosed publicly in any government website; (iii) not collected regularly and are not up to date; and, (iv) gaps in data quality assurance

# Mainstreaming Strategies and Approaches

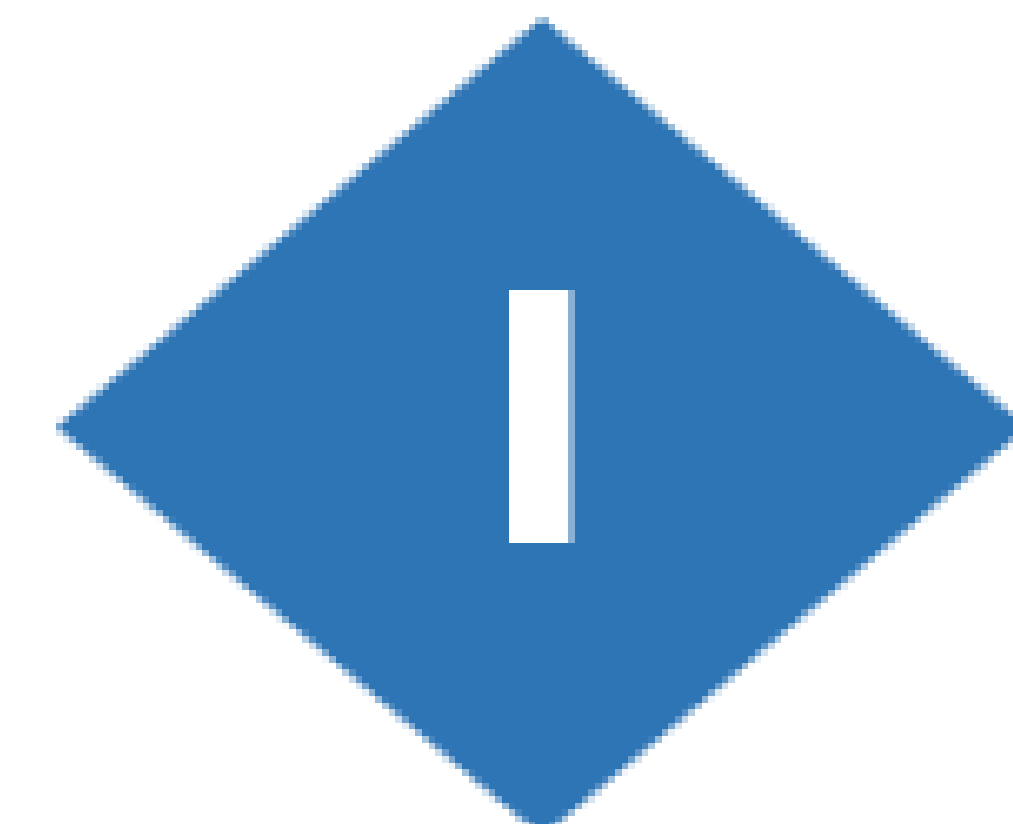

**Partnerships and collaboration**

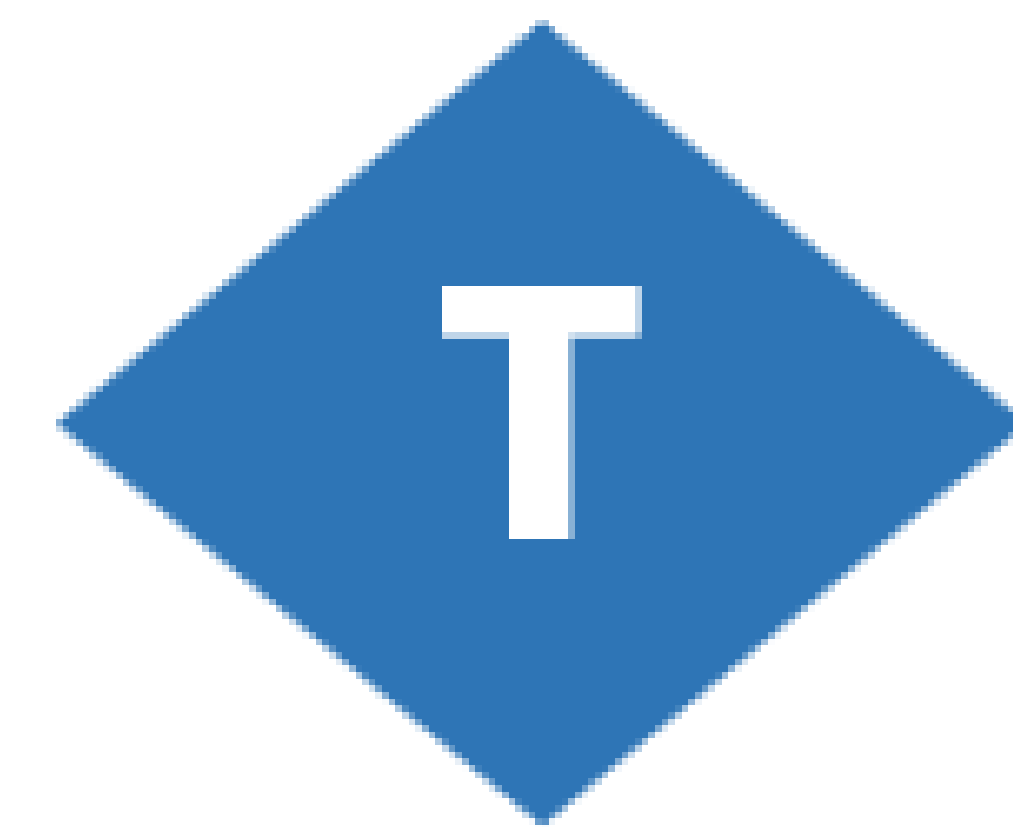

**Holistic approach, involving whole of stakeholders**

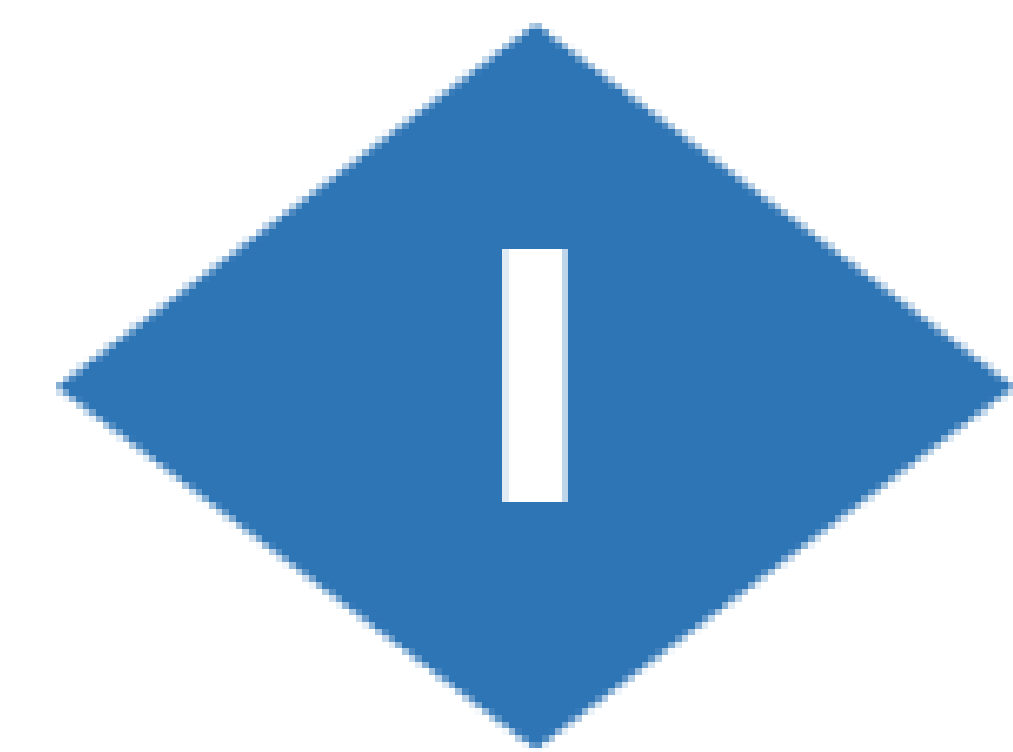

**Enabling policy environment**

**Institutional capacity development both at the supply (data disclosure) and demand side (utilization)**

**Track progress through results-based management and M&E**

**Incremental achievement of systematic disclosure (COMMITMENT)**

**Goal: Strengthened transparency and accountability in the extractives sector through systematic disclosure of EITI data**

**Thank you for  
listening.**
